New and Interesting Varieties

HARDY PERENNIAL PHLOX—Very attractive, sturdy bushes about 2 feet high, bearing large clusters of flowers. We have this in separate colors as follows: Pink, Scarlet and Blue Shades at 25c per pkt. post-paid. Planted from December to April.

LARKSPUR—Well known annual, long erect spikes of beautiful attractive flowers. Seed sown from January to April in open ground. Separate colors: Apple Blossom, Pink, Bright Carmine, Red and Dark Blue, Double Ranunculus Flowered Mixed. Price: 15c per pkt., post-paid.

POPPY—Annual, 2 to 3 feet high, showy blossoms both single and double, planted in a permanent location from January to April. Rosy Morn and Flanders Field: 15c per pkg., postpaid.

Our Greeting to You

DEAR FRIENDS AND CUSTOMERS:

We extend our appreciation to you for your orders and business as we enter into another year of furnishing wealth and happiness to our hundreds of thousands of satisfied customers, and we hope with the year of 1929 we will enjoy your liberal patronage as in the past and your influence with your friends who are interested in the planting of seeds to produce a crop in this year.

Again thanking you, we remain.

Very truly yours,

J. STECKLER SEED CO., Ltd.

THE following prices are made on a very conservative basis, and we hope those of our friends who are in need of seed will look over our catalogue carefully and compare **QUALITY** above all and price secondary.

To the Merchant, the Planter, the Farmer and Gardener, our advice is to diversify. The great misfortune that has befallen Louisiana is due to the fact that our Farmers and Planters have all stuck too closely to the three crops, Sugar, Rice and Cotton. We do not advise the discontinuance of anyone of these that you have been planting, but to reduce the acreage and start the following:

A cow for your own use, or more, if the neighborhood warrants it, and not only for making Butter, Cream Cheese and supplying yourself with milk, but your neighbors as well; the same with Poultry, get the very best breed, both for Eggs and Meat. As a dual fowl, we recommend the Rhode Island Red; a few Duroc Jersey Hogs to raise your own meat. A small Pecan Grove, planting between Magnolia Figs and Satsuma Orange Trees. The Pecans are today a great revenue to our citizens of Louisiana. The Figs, a great market for the preserves, and a great demand for Satsuma Oranges. Everyone of these fruits grow very luxuriantly in any part of the south. There are many other fruits that we could advise planting in the south that would help the man on the farm. In addition to this of course all the different varieties of vegetables as listed in this catalogue. At a small expense you can get a canning machine to can your surplus vegetables for home use. Any further information that you desire regarding any of the above which you do not find in our catalogue, please communicate with us and we will gladly furnish it to you.

While this is the second time this article appears in publication, the value of this doctrine cannot be too forcibly impressed on our friends.

Our firm has served the South for 108 years and we feel your confidence will not be misplaced.

J. STECKLER SEED CO., Ltd.

Joseph Steckler, President.

We have no other Connection or Branch

You Want Prompt Delivery

So Help Us Give It by Following these Directions in Ordering

ORDER EARLY. It will be greatly to your advantage to send us your orders as soon as you have had the time to make your selection. This assures you prompt shipments from our complete stocks and avoids any possible delays incident to the "Rush Season."

IN ORDERING follow catalog prices. They include prepayment of postage on all seeds ordered by packet, ounce, quarter-pound, pound and five-pound lots, unless otherwise specifically stated. If the order is to be sent by express or freight, deduct five cents per pound from prices given. Larger quantities than five pounds will be sent by express or freight, the customer paying such charges. To figure the cost of postage on flowering plants and trees, add 15 per cent to the list price.

THE POSTAGE TO FOREIGN COUNTRIES must be added to the cost of the goods selected in this catalogue, or the order will be reduced to allow for the postage. These rules will also apply to orders from the United States where no postage allowance is made for mailing, or we will send by express.

CENTRAL AND SOUTH AMERICA. Postage Rate, 14c per lb.

PANAMA. Limit Weight, 50 lbs. Postage Rate, 12c per pound.

CUBA. Limit Weight, 4 lbs. 6 oz. Postage Rate, 2c per ounce. First class mail only.

CANAL ZONE. Limit Weight, 50 lbs. Postage Rate, 12c per pound.

MEXICO. Limit Weight, 20 lbs. Postage Rate, 13c per pound, plus sur charges, 5c.

EXPRESS RATES on shipments of 20 lbs. or more are often cheaper than Parcel Post Rates. When paying Express charges on seeds, you are entitled to second class rates. Don't let your express agent charge you "First Class" Rates on such shipments.

OUR TERMS. Cash with order. Remittances can be made in the following manner: By Post Office Money Orders, Express Money Orders, Checks, or Drafts on New Orleans or New York. Where it is not possible to secure these, Currency or U. S. Postage Stamps in good order will be accepted. If you send a check on a Country Bank, add 10c EXTRA FOR EXCHANGE. All letters containing currency or stamps should be registered to insure safe delivery. **WHEN GOODS ARE ORDERED C. O. D. HALF THE AMOUNT MUST ACCOMPANY THE ORDER. LIVE STOCK, PLANTS AND TREES WILL NOT BE SENT C. O. D.**

WHEN ORDERING, write your name plainly, give correct P. O. address if by mail; if by express, give your express office or nearest express office, to avoid any delay, if by rail or boat, give station or landing, and if possible the name of the railroad or name of boat. Where no instructions are given as to how shipments should be made, we will use our own discretion; but we urge all customers to state plainly whether they want goods mailed, expressed or shipped by boat or by rail. As all shipments by boat must be prepaid, customers not known to us must remit enough to cover freight.

NON-WARRANTY. The J. Steckler Seed Co., Ltd., gives no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds (bulbs, or plants), it sells and will not be responsible for the crop.

We have discontinued the 5 cent packages altogether on flower and vegetable seeds, because the quantity in a 5 cent package does not give enough seed to be of any benefit. Prices on packet seeds, except where noted, will be 10 cents per packet; 3 packets, 25c; \$1.00 per dozen, postpaid.

Steckler's Vegetable Seeds

Steckler's Artichokes

1. **LARGE GREEN GLOBE.** French grown. Culture—Planting time Southern States. Sow seed in seed bed in December to June, about 1½ oz. of seed to 150 feet of row 3 inches apart in the row and rows about 1 foot apart (will produce about 150 plants.) Cover about ½ inch with earth. Transplant in October to open ground about 1½ feet apart in rows and rows about 3 feet apart.

2. **JERUSALEM OR GROUND ARTICHOKE** (a tuber.) Plant whole tubers 10 to 12 bushels to the acre, and cultivate like potatoes; production 200 to 500 bushels per acre. Used both for table and stock feed. Planted after danger of frost is over, usually after April 15th.

PRICES: Large Green Globe—Pkt. 20c; ½ oz. 40c; oz. 75c; ¼ lb. \$2.50, postpaid.

Jerusalem or Ground Artichokes—Lb. 25c; 3 lbs. 70c, postpaid.

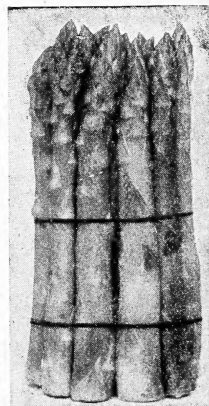

Steckler's Asparagus

Culture—Planting time, Southern States. Sow seed January to April in seed bed about 4 ounces of seed to 150 feet of row, 2 inches deep in rows 18 inches apart (will produce about 800 plants.) Transplant to specially prepared Asparagus beds December to February about 12 inches deep, 24 inches apart in rows about 4 feet apart. Send for book on Asparagus Culture, \$1.31, postpaid.

3. **MARY WASHINGTON.** Result of development by U. S. Department of Agriculture to produce a rust-resisting, vigorous strain of Giant Asparagus.

Two year old Mary Washington Asparagus Roots.

PRICES: Pkt. 10c; oz. 20c; ¼ lb. 65c; lb. \$2.00, postpaid. Mary Washington Asparagus Roots, 2-year-old—25 roots, 60c; 50 roots, \$1.00; 100 roots, \$1.50, postpaid. Not prepaid, 1000 roots, \$10.00.

Mary Washington
Asparagus

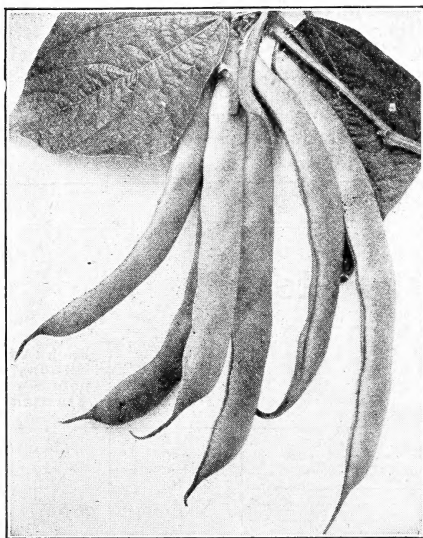

Steckler's Garden Beans

Culture—Planting time, Southern States—Spring January to May; Fall, August to November. Plant 1 pound to 150 feet of row, 1¼ bushels to one acre; drop two beans every two or three inches in rows 1½ feet apart. Cover about one inch with earth. Average production green beans about 100 bushels per acre.

SNAP BEANS, DWARF OR BUSH—GREEN PODDED BEANS

Height of bush 15 to 25 inches. All varieties marketed as green beans except Red Kidney and White Navy or Boston which are left to mature.

4. **BLACK VALENTINE.** Edible condition 54 days. Pods about five inches long averaging 6 to 7 beans to each pod. Excellent shipper, very hardy and productive. **Prices:** Pkt. 10c; lb. 45c; 5 lbs. \$1.75, postpaid. Not prepaid. Peck, 15 lbs. \$3.75; bu. \$14.00.

Giant Stringless Green Pod

5. **BOUNTIFUL.** Edible condition about 53 days. Pods longer than Black Valentine and flat. A prolific bearer absolutely stringless at all stages, the very best for private and shipping purposes.

6. **BURPEE'S STRINGLESS.** Edible condition about 50 days. Pods round 6 inches long, tender and brittle. Absolutely stringless and largely grown for canning purposes, among the very best for shipping and private use.

7. **EXTRA EARLY REFUGEE.** Edible condition about 58 days. Pods short, round, and meaty, absolutely stringless, light green and curved. An excellent shipper and for private use.

8. **FRENCH MARKET or LONGFELLOW.** Edible condition about 60 days. Pods longer and rounder than Black Valentines. More meaty, pods about 5 inches long, stringy, and containing 6 to 7 beans. Very productive and good shipper.

9. **GIANT STRINGLESS.** Edible condition about 62 days. An exceedingly productive sort, plants are large, vigorous and spreading. Pods large and nearly round and of medium green color. Quality is very good for home use and one of the best for canning and shipping purposes.
Prices on all above: Pkt. 10c; lb. 50c; 5 lbs. \$2.25, postpaid.

10. **WHITE NAVY or BOSTON.** Left to maturity. Small white bean, known and used throughout America for soup and baking purposes.

11. **HOPKINS IMPROVED RED VALENTINE.** About 58 days to edible condition. Pods short, round, brittle and tender. A popular variety for shipping and canning.

12. **RED KIDNEY.** Left to maturity. A red kidney shaped bean, used for baking and soup.

Prices on all the above: Pkt. 10c; lb. 40c; 5 lbs. \$1.50, postpaid.

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED.

BUSH WAX BEANS

Height of Bush 15 to 25 inches.

13. **CURRIE'S RUST PROOF.** Edible condition about 52 days. Long, yellow, flat stringless pods. Rust resistant. A favorite wax variety for shipping and home use, very hardy.
14. **DAVIS WHITE KIDNEY WAX.** Edible condition about 52 days. White kidney shaped beans. Pods light yellow, long and straight, a heavy producer.
15. **HODSON'S WAX.** 72 days to edible condition. Pods about 7 inches long, slightly curved, flat, creamy white, containing 6 to 7 beans, suitable for snaps only when very young. Used extensively by Market Gardeners in the South on account of its shipping qualities, and also good for home consumption.
16. **PENCIL POD WAX.** 57 days to edible condition. Fairly hardy and productive, medium early, the very best for home use and near markets, pods are long, straight, round, fleshy, tender, absolutely stringless.
17. **ROUND POD KIDNEY WAX.** 56 days to edible condition. Very hardy and productive variety, pods long, light yellow and straight and stringless, of the best quality. Good sort for marketing as well as home use.

Prices on the above: Pkt. 10c; lb. 50c; 5 lbs. \$2.25, postpaid.

18. **SURE CROP WAX.** 56 days to edible condition. Vigorous and hardy, fleshy, stringless, pods about six inches long, nearly round. A desirable variety for shipping as well as home use.

Prices: Pkt. 10c; lb. 50c; 5 lbs. \$2.25, postpaid.

19. **WARDWELL'S KIDNEY WAX.** 57 days to edible condition. Extensively used for snaps for home consumption, pods nearly straight and of good quality. Commands a ready sale. A good family variety.

Prices: Pkt. 10c; lb. 45c; 5 lbs. \$1.75, postpaid.

20. **IMPROVED STRINGLESS KIDNEY WAX.** 65 days to edible condition. A bean that we take pleasure in recommending to our friends. Pods are nearly straight, good width, thick and stringless. Is a fast and healthy grower and despite wet weather it will remain free from blight or rust. We consider this bean superior to Wardwell's in that with the same attention it will produce nearly twice as many pods and is unexcelled for canning. We recommend it whether for home gardening or trucking for shipping purposes, due to their unexcelled carrying qualities.

Prices: Pkt. 15c; lb. 60c; 5 lbs. \$2.50, postpaid.

Currie's Rust Proof Wax

BUSH LIMA BEANS

Height of Bush 15 to 25 inches.

21. **BURPEE'S BUSH LIMA.** 80 days to edible condition. Plants are uniformly dwarf, vigorous and productive, pods medium green, very large, about five inches long, the most extensively used bush limas for marketing purposes as well as home consumption.

22. **FORDHOOK BUSH LIMA.** 77 days to edible condition. An improved dwarf lima, sometimes called Potato Bush Lima, plants are vigorous and erect, pods produced in large clusters, medium green, a popular variety for home and marketing purposes.

Prices on above: Pkt. 10c; lb. 50c; 5 lbs. \$2.00, postpaid.

23. **HENDERSON'S BUSH or BABY LIMA.** 75 days to edible condition. Extremely early, hardy and productive, pods are medium dark green, short, flat, of excellent quality either green-shelled or dry. Much used by canners as well as for home and marketing.

24. **STECKLER'S NEW CALICO or JACKSON WONDER BUSH BUTTER.** 75 days to edible condition. Pods short, used also for shelling. Name "Calico" derived from appearance at maturity. An excellent Southern bean, both for family use and for shipping, cannot be too highly recommended.

Prices on above: Pkt. 10c; lb. 40c; 5 lbs. \$1.50, postpaid. Not prepaid, peck (15 lbs.) \$3.25.

Burpee's Bush Lima

SNAP BEANS—POLE OR RUNNING

Use poles 5 to 8 feet long, set in rows 4 feet apart, plant 6 beans around pole. Half pound plants 150 hills; half bushel to one acre.

25. **BLACK VALENTINE or BLACK CREASEBACK.** 75 days to edible condition. Thrifty and extremely prolific, yields better than other varieties of pole beans, thick, stringless pods, meaty, tender and excellent flavor, perfectly round. Excellent for shipping and for home use.

26. **IMPROVED KENTUCKY WONDER or OLD HOMESTEAD.** 68 days to edible condition. Early very prolific sort of excellent quality. Vines are vigorous, very productive, comparatively straight. Best quality for home use and for shipping purposes.

27. **MCCASLAN.** 80 days to edible condition. Pods very long, flat and brittle, an excellent pole bean for all purposes.

28. **STRIPED CREASEBACK.** 73 days to edible condition. A very hardy and productive green podded bean. Pods are long, very cylindrical or completely rounded, distinctly crease-backed, very fleshy and of excellent quality. Very good for shipping and home consumption.

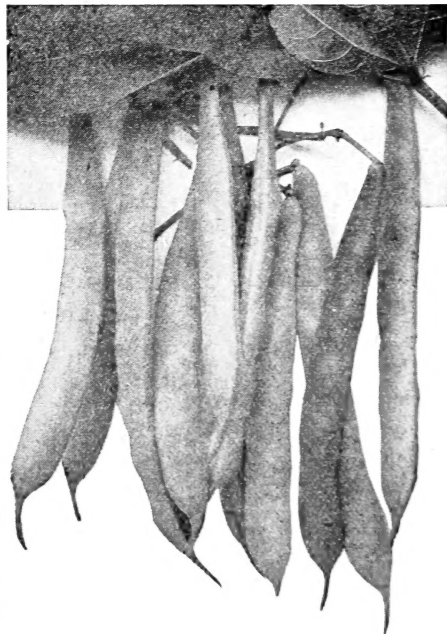

29. **WHITE CORNFIELD.** 75 days to edible condition. Early maturing, green podded, round and very often 8 to 10 inches long and quite stringless. For planting with corn, this sort is hard to beat. Good for shipping and home consumption as well.

30. **WHITE CREASEBACK.** 75 days to edible condition. Green podded variety, valuable for its earliness, vigorous grower, pods are medium length, comparatively straight. They are of the best quality for shipping and home consumption.

Prices: Pkt. 10c; lb. 45c; 5 lbs. \$1.75, postpaid.

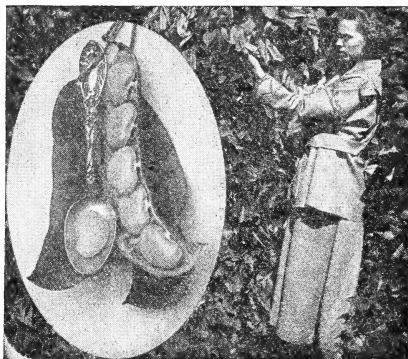

31. **YARD-LONG.** 60 days to edible condition. Pods average about 2 feet in length, very slender and a bean which should be planted in every garden due to it being prolific, tender and for its unusual flavor. Requires only a few beans to make a family dish.

Prices: Pkt. 15c; ½ lb. 40c; lb. 75c, postpaid.

White Creaseback

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

Carolina

POLE LIMA BEANS

32. CAROLINA or SEWEE. 82 days to edible condition. Very early and reliable pole lima especially adapted for planting in the South. Vigorous growing, and pods dark green, short, about three inches and curved. Highly recommended for home and shipping purposes.

33. LARGE WHITE LIMA. 85 days to edible condition. The true Large Pole Lima bean. A late variety with pods about 5 to 5½ in. long, very broad, borne in clusters and pods usually contain 4 beans. Excellent for shipping and private use.

34. SPOTTED or FLORIDA BUTTER. 82 days to edible condition. Larger pods than Carolina, very prolific, in great demand by Southern gardeners and for home consumption.

Prices on above: Pkt. 10c; lb. 40c; 5 lbs. \$1.50, postpaid.

35. SOUTHERN WILLOW LEAF. 82 days to edible condition. Similar to the Sewee but a heavier yielder, early and prolific, leaves are willow leaf in shape and produces pods from the bottom to the very top of the vine. Hardy, early and drouth-resistant, thrives in sandy land, good shipper and excellent for home use.

Prices: Pkt. 10c; lb. 50c; 5 lbs. \$2.25, postpaid.

WINDSOR BEANS

37. ITALIAN or ENGLISH. Long variety. Edible condition about 80 days. Plant about two beans every 6 inches and about 2½ feet between rows. Used same as Lima beans. Of late it has gained fame and is being planted extensively by Italian gardeners for shipping and for home use.

Prices: Pkt. 10c; lb. 50c; 5 lbs. \$2.25, postpaid.

POLE WAX BEANS

36. GOLDEN CLUSTER WAX POLE. 80 days to edible condition. An early and attractive sort, one of the best wax-podded snap pole beans. Pods are six to eight inches long, borne in abundant clusters, each containing from three to six pods varying in color from golden yellow to creamy white, very good quality and highly recommended for shipping and home use.

Prices: Pkt. 10c; lb. 50c; 5 lbs. \$2.00, postpaid.

Steckler's Garden Beets

Culture—Planting time, Southern States. Spring, January to July; Fall, September to December. Edible condition about 62 days from time of planting seed. Plant 2 ounces to 150 feet of row, 12 pounds to one acre. Sow in thick rows about 12 inches apart or sow broadcast and thin to about 10 inches apart.

38. CHICAGO EARLY BLOOD TURNIP. Oval shape, dark red flesh, smooth skin, a favorite among private and market gardeners. Extensively used for canning and shipping.

39. CROSBY'S EARLY EGYPTIAN. Beets globe shaped, center of best light blood red, tender, excellent eating. Grown extensively by market gardeners in South for shipping and home use.

40. DETROIT DARK RED. Beets oval shaped, flesh of beet very dark red, an excellent variety for shipping and eating. A favorite of many large Southern market gardeners. Excellent for canning and shipping.

41. EARLY BLOOD TURNIP. Beet top shaped, dark red flesh, perhaps the most popular in the South for the small and the large gardener.

42. WONDER BEET. One of the earliest of table beets for out side culture. Bright red skin, vermilion red flesh with distinct zones of lighter red. Of excellent quality being sweet, tender and free from fibrous roots, good shipping and canning variety.

43. ECLIPSE. Beets globe shaped, small top, dark red, sweet and fine grained flesh, very popular. Especially used for home and shipping.

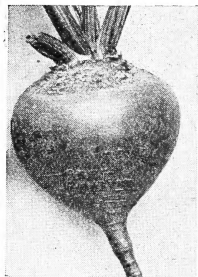

44. EDMOND'S EARLY BLOOD TURNIP......Oval shaped, deep blood skin, dark flesh, small tap roots and small top. Its popularity increases as gardeners plant it. Excellent for shipping purposes and very desirable.

45. STECKLER'S EXTRA EARLY. Globe shaped, dark red flesh, small roots and tops. The Southern gardener's favorite. Excellent for shipping and perfectly zoned.

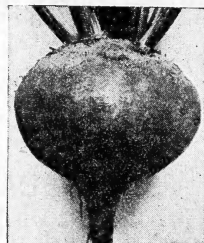

46. FIREBALL. A new distinct variety, having the finest table qualities. Flesh solid, crisp, sweet and brilliant red color. Globe shape, skin smooth. Especially desirable for canning or pickling. An ideal beet for marketing and for home use.

47. EARLY MODEL. Very early, round and a rich blood red. Excellent for shipping and for table use.

Prices on all the above: Pkg. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00; 5 lbs. \$4.50, postpaid.

Detroit Dark Red

Crosby's Extra Early

48. SWISS CHARD or PERPETUAL SPINACH BEET. Is a variety of recent introduction. Leaves much darker green than the Lucullus. As the outer leaves are cut more come up from the center. The center stems can be cooked and served like Asparagus and the leaves cooked like Spinach or other greens. It is undoubtedly one of the best Vegetables, as this can be grown throughout the summer. Planted extensively in the South both by Market Gardeners for shipping and by Home Gardeners.

49. SWISS CHARD LUCULLUS. Sow in rows 16 inches apart and thin to 12 inches between plants. A very good variety, leaves may be cut all summer and new shoots spring up, will make large curly leaves with thick light colored mid-ribs which are delicious when cooked like Asparagus and leaves make excellent greens. This is grown extensively throughout the South by Market Gardeners for shipping as well as by home gardeners, very highly recommended.

50. SWISS CHARD or SEA KALE. Grows upright and as the outer leaves are cut, other leaves grow from the center, the mid-rib or center stem of each leaf is large and almost white, can be cooked like Asparagus and the leaves are cooked like Spinach or other greens. Delicious flavor.

Prices on above: Pkt. 10c; oz. 15c; ¼ lb. 30c; lb. 90c; 5 lbs. \$4.25, postpaid.

Swiss Chard

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

Steckler's Sugar and Stock Beets

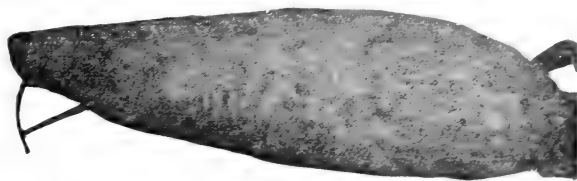

Culture—Planting time, Southern States. Spring, January to July; Fall, September to December. Sow 4 or 5 pounds to one acre in rows 2 to 3 feet apart. When 4 or 5 inches high thin to 12 to 15 inches apart in rows. Ready for harvest about 75 days after planting of seed.

51. GOLDEN TANKARD. Yellow golden flesh, very nutritious, excellent for stock food. Very broad shouldered and short rooted.

52. LONG RED MANGEL. Flesh white with reddish tinge. Heavy yields, 18 to 24 inches long, about 6 inches in diameter. We recommend this as the best variety of stock beet.

53. KLEIN WANZLEBEN. Sugar beet experts have united in recommending this as possessing the highest sugar producing qualities, as much as 18 tons of sugar having been made from 100 tons of root of this variety. We highly recommend it also for feeding.

54. WHITE FRENCH HALF SUGAR MANGEL. Grown extensively in the South both for stock feeding and for sugar, an excellent variety. Roots are oval shape with smooth, clean skin and grow with the tops of the bulbs two or three inches above ground and consequently are easily pulled. We recommend a general planting of both this and the Klein Wanzleben for they are both worth while on any farm where cows are kept. Prices on above: Pkg. 10c; oz. 15c; ¼ lb. 25c; lb. 60c; 5 lbs. \$2.00, postpaid.

Klein Wanzleben Sugar Beet

Steckler's Broccoli

Culture—Planting time, Southern States. Spring, January to June; Fall, September to December. Plant 1½ ounces to 150 feet of row. Plant and cultivate same as Cauliflower to which family Broccoli belongs. Head not as compact as Cauliflower.

55. EARLY LARGE WHITE FRENCH. Considered the best sort for most sections. The plants are very hardy, vigorous and easily grown. Heads are white, compact, hard and of good quality.

Prices on above: Pkg. 15c; oz. 50c; ¼ lb. \$1.90; lb. \$7.00, postpaid.

56. STECKLER'S GREEN CALABRESE BROCCOLI. A distinct variety grown by Italian gardeners for Italian trade only. Forms large solid heads which remain green, after this is cut a number of sprouts develop from the leaf-axes, each sprout terminating in a small head about 1 inch in diameter. Bunched and sold as second crop. Sow seed in frames early in spring and market in June and July. Also planted in September for Christmas marketing.

Prices: Pkt. 15c; oz. 90c; ¼ lb. \$3.00; lb. \$9.00, postpaid.

Calabrese Broccoli

Steckler's Brussels Sprouts

Culture—Planting time, Southern States. Spring, January to June; Fall, September to December. Plant half ounce of seed to 150 feet of row. Plant and cultivate same as cabbage.

57. LONG ISLAND. The small heads growing on the stalk are gathered and prepared, making an appetizing dish.

Price: Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.50, postpaid.

Steckler's Cabbage

Culture—Planting time, Southern States. Seed Spring, June to September; Fall, October to January, 1 ounce will produce about 3000 plants, 5 ounces to the acre. Sow seed 5 or 6 seeds per inch in rows about 6 inches apart in well prepared beds. Cover very lightly with earth. Keep bed moist but not wet. Transplant to field when plants are about 6 inches tall preferably on a cloudy day or in late afternoon. Frequent shallow cultivation for a short time is best. Distance between plants 12 to 15 inches; between rows about 24 inches. Approximate number of days to edible condition from time of planting of seed is given after name of each variety. This varies with weather and soil conditions.

58. ALL HEAD EARLY. 100 days. Large, flat compact and solid heads, few outside leaves, an excellent early cabbage. A dependable sort for shipping and home use.

59. ALL SEASON. 130 days. A very desirable large cabbage, adapted for autumn as well at late summer. Plants are vigorous and sure heading, very solid and of excellent quality. It is remarkable for its ability to stand the hot sun and dry weather. Desirable for shipping as well as home use.

Prices: Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.50, postpaid.

60. CHINESE or PETSAL. 90 days. Large crumpled light green leaves resembling Paris Cos Lettuce. Leaves are eaten boiled or raw as a salad. Popular throughout the South. Has a distinct flavor, very mild and pleasant.

61. COPENHAGEN. 100 days. Very vigorous, short stems, few outer leaves, producing a very hard, round head, very uniform in size and of long keeping qualities. Very profitable, and gaining in popularity every day, excellent for shipping and home consumption.

Prices: Pkt. 10c; oz. 30c; ¼ lb. \$1.00; lb. \$3.00, postpaid.

62. DANISH BALL HEAD SHORT STEM. 100 days. Very hardy, sure heading, very solid of good quality, one of the very best keepers and desirable for distant markets. They are exceedingly hardy in resisting cold and stand dry weather well. Medium sized heads, round and solid and stand shipment better than any other late sort.

63. EARLY DRUMHEAD SAVOY. 115 days. The Plants are vigorous, of medium size with rather short Heads are large, nearly round, fairly solid, sweet and

best for home use or market. stem and very sure heading. tender. Best for family use.

Prices: Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.50, postpaid.

64. FROTSCHER'S SUPERIOR LARGE LATE FLAT DUTCH. 130 days. Large solid flat heads, sometimes weighing 15 to 25 pounds. This is the most popular winter cabbage among Southern gardeners for home consumption and shipping.

65. LOUISVILLE DRUMHEAD. 130 days. Heads broad semi-flat, short stem and compact. Planted extensively for home use and shipping.

66. MAMMOTH RED ROCK. 130 days. Largest and surest heading red cabbage. Plants large and vigorous with medium length stem and spreading outer leaves which are dark green with red veining. Heads are late maturing, large, round, very solid and of very attractive deep red color. Much used for cole slaw and pickling.

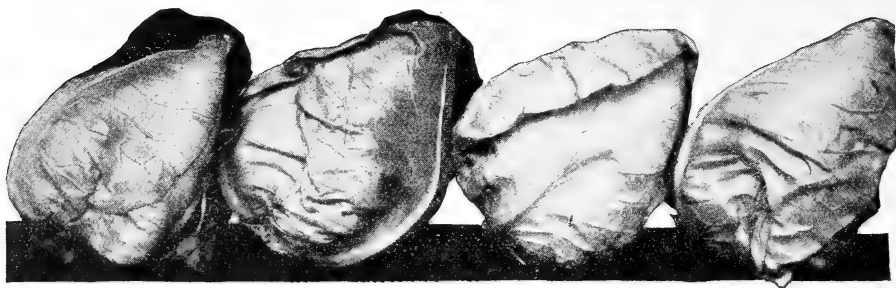

Copenhagen Market

Danish Ball Head

Cabbage—Continued

Steckler's Special Charleston Wakefield

- 67. SELECTED EA. JERSEY WAKEFIELD.** 90 days. A most excellent variety, is the earliest and surest heading of first early cabbages for the market and home garden. Most gardeners depend on it for their extra early crop. Plants hardy, resistant to cold and unfavorable conditions. Compact and erect or very slightly spreading. Stem short, heads are medium, very solid uniformly pointed and of excellent quality.
- 69. STECKLER'S SPECIAL CHARLESTON WAKEFIELD.** 115 days. Very solid head, but less pointed and considerably larger than the Early Jersey Wakefield. Its exceeding hardiness, earliness and size of head have made it with market gardeners and shippers a popular sort. Plants are medium sized, very vigorous and slightly spreading. Heads are blunt pointed but very broad at the base. Excellent for marketing and home use.
- 70. STECKLER'S SPECIAL SUCCESSION.** 115 days. A sure heading sort, adapted for autumn as well as late summer use. Plants are vigorous and strong growing, with a short stem and have numerous, rather short, outer leaves which are somewhat frilled. Heads are large, deep, very firm and of excellent quality. Extra fine for shipping and home use.
- 71. STEIN'S EARLY FLAT DUTCH.** 115 days. Heads flat, very large, compact, grows vigorously and has short stem. Many gardeners prefer this variety because of its excellent record of forming heads under unusual weather conditions. Good shipper.
- 72. SURE HEAD.** 120 days. Named because of its certainty of making heads. Very large flat heads, weight 10 to 15 pounds, uniform and firm. Grown very extensively. Very good shipper.
- 73. GLORY OF ENKHUIZEN.** 100 days. A sureheader of matchless quality and of an early variety. The heads are nearly round, solid and of splendid size for an early variety. Leaves are broad and spreading and more or less curved. This cabbage has met with instant favor all over the South for marketing and home use. Prices on above: Pkt. 10c; oz. 30c; ¼ lb. \$1.00; lb. \$3.00, postpaid.
- 74. BUGNER'S VERY SOLID LATE WINTER YELLOW RESISTANT CABBAGE.** A yellow disease-proof variety, practically immune from attack of "yellows" the most destructive cabbage disease known. Becoming extremely popular for shipping and home use, and for kraut making. Prices: Pkt. 15c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.50; lb. \$5.00, postpaid.
- 75. STECKLER'S GOLDEN ACRE.** 95 days. A very compact medium sized head, an improved variety. Heads uniform in size and in maturing. This variety is growing very rapidly in popularity for both shipping and home use. Price: Pkt. 15c; ½ oz. 30c; oz. 50c; ¼ lb. \$1.50; lb. \$5.00, postpaid.

Steckler's Carrots

Culture—Planting time, Southern States, Spring, January to June; Fall, August to December. Plant 1½ oz. to 150 feet of row. 4 lbs. to one acre. Sow fairly thick in rows 15 to 18 inches apart and thin to 3 to 4 inches apart in rows, when two inches high. Approximate number of days to edible condition is given after name of varieties.

- 76. DANVER'S HALF LONG.** 65 days. A half long orange carrot, grown extensively in all classes of soil. Desirable and suitable for field culture. Mature roots are of medium length, six to eight inches long, tapering uniformly to a blunt point. Flesh is orange color, very tender and of excellent quality. Favorite for the South for shipping and home use.
- 77. EARLY HALF LONG CHANTENAY.** 65 days. An excellent medium early, half long variety. One of the best for marketing and home use, very productive and desirable. Roots are thick, five and one-half to six inches in length, uniformly half long or stump rooted but tapering slightly, smooth orange-red color. Flesh very crisp and tender. Extensively used for bunching.
- 78. EARLY SCARLET HORN.** 70 days. Very excellent for early planting for table. Tops are small, roots are orange red about 2½ to 3 inches long, top shaped but tapering to a small tap.
- 79. OXHEART or GUERANDE.** 65 days. Excellent variety for soil that is hard and stiff, tops are comparatively small, and mature roots are four and a half to five inches long, very thick. Flesh is bright orange, finely grained and sweet. Excellent for table use and for shipping purposes.
- 80. STECKLER'S GOLDEN ROD.** 65 days. Heavy producer, deep orange. One of the finest varieties. One that is destined to become one of the leaders for shipping and home consumption. Prices on above: Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.25; 5 lbs. \$5.00, postpaid.
- 81. IMPROVED LONG ORANGE.** 80 days. This variety is intermediate to late maturing, desirable for table use as well as stock feeding, very productive, uniform in shape. Roots are tender and of good quality.
- 82. LARGE WHITE BELGIAM.** 100 days. Creamy white with light green crown about 7 to 9 inches in length. Used extensively for stock feeding. Prices on above: Pkt. 10c; oz. 15c; ¼ lb. 25c; lb. 75c; 5 lbs. \$3.00, postpaid.

Danver's Half Long Carrots

Steckler's Cauliflower

Culture—Planting time, Southern States, Seed, Spring, January to March in hotbeds, in open ground to June; September to December. Plant $\frac{1}{4}$ ounce to 150 feet of row. Transplant $1\frac{1}{2}$ feet apart in rows, rows $2\frac{1}{2}$ feet apart in open ground. Approximate number of days to edible condition is given after name of each variety. This varies with climatic and soil conditions.

83. EARLY ITALIAN GIANT. 110 days. Large white compact heads, delicious flavor. A fine variety. Excellent for home use and shipping.

84. LARGE ALGIERS (Vilmorins). 120 days. Large white heads, excellent quality, upright growth, leaves forming protection for heads against frost. The market gardener's favorite, for home use and shipping.

85. LATE ITALIAN GIANT. 120 days. The largest of all Cauliflowers, very compact, grown very extensively and well liked. A favorite for home use and shipping.

Prices on above: Pkt. 15c; oz. 75c; $\frac{1}{4}$ lb. \$2.50; lb. \$8.00, postpaid.

86. STECKLER'S EXTRA SNOWBALL. 110 days. Large compact heads, a very desirable and dependable head forming Cauliflower. The most popular variety among Southern gardeners. Favorite for shipping and home use.

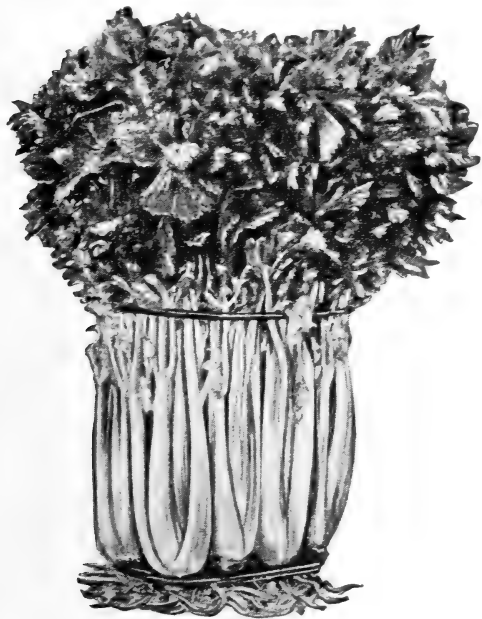

87. STECKLER'S SIX WEEKS. 90 days. The earliest of all varieties. Matures six weeks from time of transplanting. Too much of this variety cannot be planted. Recommended highly for home use and shipping. White head.

Prices on above: Pkt. 25c; oz. \$2.00; $\frac{1}{4}$ lb. \$7.00; lb. \$25.00, postpaid.

Steckler's Celery

Culture—Planting time, Southern States. For bleaching celery. Seed June to August; for seasoning purposes any month. Plant $1\frac{1}{2}$ ounces to 150 feet of row. Sow seed in a bed, cover with canvas to protect from heat. Transplant to large bed when about 3 inches high to rows 3 feet apart, plant about 8 inches apart. When about matured earth is brought up around the plants or boards are placed on both sides of rows for proper bleaching. Approximate time to maturity is given after each variety, this varies with climatic conditions and soil.

Golden Plume Celery

Steckler's Early Snowball

88. CELERY FOR SOUP. 125 days. Sown broadcast in spring and fall and used extensively for seasoning the same as parsley.

89. CELERIAC, TURNIP ROOTED. 135 days. Forms a turnip-shaped root which is used extensively for soup, cooked and sliced or in salad.

90. GIANT PASCAL. 135 days. Grows about 2 feet high, forms broad, thick, crisp stalks, entirely stringless. Very desirable and planted extensively throughout the South.

91. LARGE WHITE PLUME. 125 days. Yellowish white color, easily bleached, crisp and tender. A popular variety among gardeners.

Prices on above: Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. 90c; lb. \$3.50, postpaid.

92. GOLDEN SELF-BLANCHING (French Grown). 135 days. Solid, very tender, golden yellow color, brittle with delicious flavor. We cannot recommend this variety too highly.

93. GOLDEN PLUME CELERY. Early, delicious and self-blanching. Early maturing, large and vigorous grower, easy to cultivate, very attractive and when matured is most inviting, foliage creamy yellow and stalks creamy white, brittle, tender and well flavored, profitable for marketing and home use. Extra fine strain.

Prices on above: Pkt. 15c; oz. \$1.00; $\frac{1}{4}$ lb. \$3.50; lb. \$12.50, postpaid.

STECKLER'S CHERVIL (Curled)

94. Culture—Used a great deal for seasoning, especially in oyster soup and is often cut between lettuce. Sow broadcast during Fall and Winter for spring and in January and February for summer. A favorite in the South.

Prices: Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.50, postpaid.

STECKLER'S CHIVES or Schnittlauch

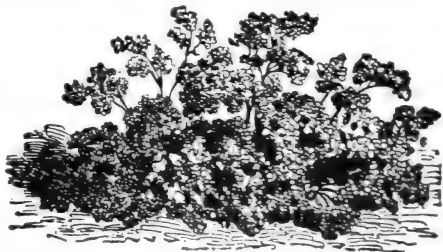

95. Culture—One of the finest and most delicate of entire onion family. Tops are used for seasoning salads, cream cheese, etc. Plant from December to April.

Prices: Pkt. 15c; oz. 75c, postpaid.

STECKLER'S GEORGIA COLLARDS

96. Culture—Planting time, Southern States, Spring, June to September; Fall, October to January. Plant two ounces to 150 feet of row. Belongs to cabbage family and is cultivated in same manner. Edible condition about 85 days. One ounce will produce about 2500 plants.

Prices: Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 25c; lb. 75c, postpaid.

Chervil

Steckler's Corn

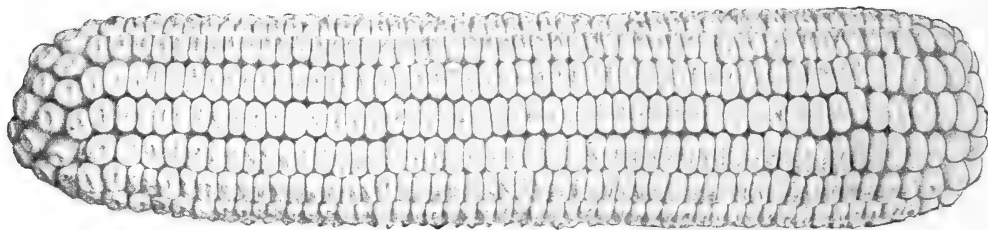

Bred with Bloodlines for yield Production.

Culture—Planting time, Southern States, February to July. Plant in hills about 3 feet apart in rows and rows about 3 feet apart, four or five seeds and thin out to 2 or 3. For the best success, seed corn should be planted within three days from time of receipt from Seed House to avoid trouble from weevils. A pound will plant about 400 hills. One peck to an acre. Approximate number of days to edible condition (roasting ears) on Sweet and Sugar Corn and to maturity on Field Corn is given after each variety. This varies with soil and climatic conditions. Corn is often planted some each week during planting season so that the harvest will be throughout the season.

Sweet Corn

14 lbs. 1 peck; 56 lbs. 1 bushel.

- 97. EXTRA EARLY ADAMS.** 63 days. Stalks about 3½ feet tall, ears about 5½ inches long. One of the best roasting ear corn that can be planted. Usually 12 rowed, white kernels and white cob.
- 98. FROTSCHER'S ADAMS EARLY.** 68 days. Similar in type to the Adams Extra Early but larger and somewhat later although still a very early sort. Used as a table corn throughout the South both for home use and shipping, average height of stalk 4½ feet.
- 99. STECKLER'S FRENCH MARKET.** 75 days. Stalks average about 7 feet in height, ears about 7 to 8 inches long, well filled. A favorite among shippers and for home consumption as well.
- 100. TRUCKER'S FAVORITE.** 105 to 110 days. Large late corn often used for roasting ears. Ears around 11 inches long with 12 to 14 rows of broad white kernels. Stalks tall with medium foliage, one of the leaders for shipping.
- 101. SILVER MINE.** 95 days. Large White Corn, ears 9½ to 10 inches with 16 to 20 rows of large deep kernels. Rough dent, tall, heavy stalk growth. White cob. One of the best roasting ear and shipping varieties yet introduced.

Silver King

- 102. SILVER KING.** 95 to 100 days. Also known as Wisconsin No. 7 and largely grown in the southern part of that state, with early selections suitable for districts farther North including Minnesota and the Dakotas. There is also an increasing demand for the medium selections of the variety from the Southern states, and it seems adapted for any district. A heavy yielder of both ears and foliage. Ears 8 to 9 inches long, 16 to 18 rows of medium length, slightly roughened kernels. Usual maturity 95 to 100 days. White cob. One of our leading sorts for shipping and home consumption in the roasting ear. If allowed to dry a fine grist corn.

Prices: Pkt. 10c; lb. 30c; 2 lbs. 50c; 5 lbs. \$1.00, postpaid. Not prepaid, peck (14 lbs.) \$1.50; bu. (56 lbs.) \$4.50.

Sugar Corn

11 lbs. 1 peck; 44 lbs. 1 Bushel.

- 103. BARDEN'S WONDER BANTAM.** 77 days. Stalks 5 to 6 feet tall, large well filled ears 8 to 10 inches long. Grown very extensively. When better known will be planted in every home garden.
- 104. BURBANK BANTAM CORN.** Grows 12 or 14 inches higher than Golden Bantam, produces an ear equally as long as Golden Bantam with 14 to 16 rows which is much larger than the average Golden Bantam. Very sweet flavor and at least 50 per cent of the stalks produce two good large ears. Recommended for one who appreciates a good eating variety.

Prices on above: Pkt. 10c; lb. 50c; 2 lbs. 80c; 5 lbs. \$1.50, postpaid. Not prepaid, peck (11 lbs.) \$2.75; bu. (44 lbs.) \$9.50.

- 105. COUNTRY GENTLEMAN.** 80 days. Stalks 6½ to 7 feet. Ears slim, about 8 inches long. Grains, long and irregular, very narrow. Considered by many, one of the best corns for family garden. One of the most popular varieties used by Commercial Cannery. The silk on Country Gentleman ears is always very red, and it can be easily distinguished by this feature.

- 106. GOLDEN BANTAM.** 70 days. Most widely known early variety, grown in every section, stalks five feet in height, heavy foliage, ears 6 to 7 inches long, eight-rowed, with broad kernels of a golden yellow color. Flavor distinctly different. Stalks very rapidly and should be allowed to remain as the stalks are productive of an ear.

- 107. STOWELL'S EVERGREEN.** 78 days. Height of stalk about 7½ feet. Ears about 8 inches long, very white, excellent roasting ear variety. Market gardeners grow this variety more than any other.

Prices on above: Pkt. 10c; lb. 40c; 2 lbs. 70c; 5 lbs. \$1.50, postpaid. Not prepaid, peck (11 lbs.) \$2.25; bu. (44 lbs.) \$7.50.

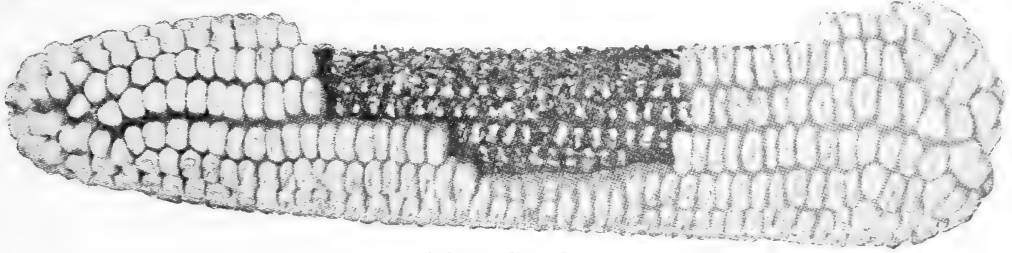

Stowell's Evergreen

Field Corn

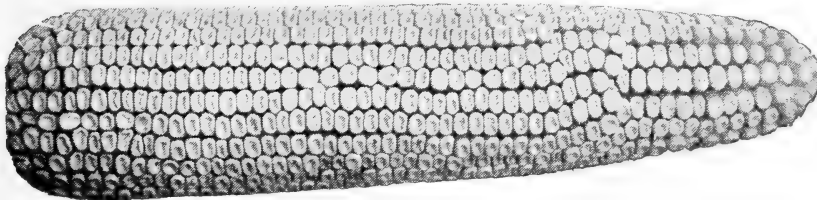

14 lbs. 1 peck; 56 lbs. 1 bushel.

- 108. CHAMPION WHITE PEARL.** 100 days to maturity. Long, pure white, heavy ear, stalks medium height, thick. Grown extensively in South by market gardeners for roasting ears.
- 109. DIAMOND JOE'S BIG WHITE.** Maturity 100 days. Ears white, 8 to 12 inches long, deep grains. Stalks 8 to 12 feet high. A favorite for roasting ears among market gardeners.
- 110. IOWA EARLY GOLD MINE.** 100 days. Yellow, deep grains heavy producer. Grown for ensilage extensively as well as feed corn.
- 111. REID'S YELLOW DENT.** 110 days. Deep yellow colored ears. Butts and tip usually covered with kernels. Leaves and stalks make excellent ensilage. A splendid feeding variety.
- 112. IMPROVED YELLOW LEAMING.** 110 days. Long yellow ears. Tall stalks producing two good ears, very productive, an excellent variety for the South. A splendid feeding variety, one of the best.
Prices on above: Pkt. 10c; lb. 25c; 2 lbs. 40c; 5 lbs. 80c, postpaid. Not prepaid, peck (14 lbs.) \$1.10; bushel, (56 lbs.) \$3.75.
- 113. ST. CHARLES RED COB.** 75 days. Stalks about 7½ feet tall, heavy producer of very large, white ears, well filled with red cob. Used for roasting ears but makes an excellent matured ear. Recommended for shipping.

Calhoun Red Cob

- 114. HASTINGS PROLIFIC WHITE.** 100 days. Requires a fairly long season to develop hard corn. Stalk is large, 8 to 12 feet tall according to soil and season. Ears of medium size, two or more to the stalk, depending on the distance given and the growing condition. Cob is small, ears are well filled out. Best corn for grain production, for roasting ears, for making meal and for stock feeding.
- 115. CALHOUN RED COB.** Cob deep red in color, kernels white and yellow, very well known. Matures in 130 to 150 days from planting. One of our leading Southern varieties.
- 116. HICKORY KING.** 110 days. A prolific white corn, large kernels, small slim cobs, prolific producer, grown extensively by market gardeners for roasting ears.
- 117. IMPERIAL WHITE DENT.** 125 days. Very large ear, stands wet weather and drought better than other varieties, strong root system, a certain cropper. In demand wherever grown. Good roasting ear for table and shipping, good for feed and for grist.
- 118. SURECROPPER CORN.** Ears not quite as large as other varieties, makes roasting ears in about 60 days and matures in about 110 days. Has drouth resisting qualities thoroughly adapted to the South.
- 119. STECKLER'S CREOLE YELLOW DENT.** 110 days. Deep yellow grains, closely packed, butts and tips covered, used very extensively for ensilage. The favorite in this section, an excellent variety for feeding and for making grist.
- 120. MEXICAN JUNE.** 125 days. A very dependable variety late in the spring throughout the Cotton belt. Stalks are usually short, ears 8 to 9 inches long, grains short to medium, cobs medium in size, white with a few blue grains. The best late corn for the South.
- 121. GIANT RED COB.** One of the finest large-eared Southern field corn, large grained, very productive, recommended highly for feeding and for milling purposes. For ensilage it is unsurpassed. Stalks 10 to 12 feet, ears 10 to 12 inches long, 18 to 22 rows, deep grain and pure white with red cob.

Steckler's Creole Yellow Flint

- 122. STECKLER'S CREOLE YELLOW FLINT.** A very hard grained corn, resists drouth better than any other variety and stands more wet weather. Produces two good ears to the stalk and is recommended for all purposes and one might say "weevil proof." One of our main varieties for feeding dry.

Prices on above: Pkt. 10c; lb. 30c; 2 lbs. 50c; 5 lbs. \$1.00, postpaid. Not prepaid, peck (14 lbs.) \$1.25; bushel, (56 lbs.) \$4.00.

POP CORN

We handle the three best varieties, White Rice, Japanese Hullless and Queen's Golden. Cultivate same as field or garden corn. Used extensively for candy making.

- 123. WHITE RICE SHELLLED.** An improved strain with large ears, and produces abundantly. Very extensively used.
- 124. QUEEN'S GOLDEN.** Stalks grow about 5 to 6 feet tall, large ears, rich golden yellow color, kernels round and smooth.
- 125. JAPANESE HULLLESS.** Known in some localities as Tom Thumb, a dwarf growing, heavy yielding variety. Excellent popping qualities, fine flavor.
Prices: Pkt. 10c; lb. 30c; 2 lbs. 50c; 5 lbs. \$1.00, postpaid.

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

STECKLER'S CORN SALAD

Culture—Planting time, Southern States, Spring, June to September. Fall, October to January. Plant 2 ounces to 150 feet of row. Sow thinly in drills. Leaves are used same manner as lettuce and cress.

126. STECKLER'S CORN SALAD. Grown and used extensively throughout the South.

Prices: Pkt. 10c; oz. 15c; ¼ lb. 50c; lb. \$1.75, postpaid.

STECKLER'S CRESS

Culture—Planting time, Southern States, Spring, January to April. Fall, September to December. Broad leaf, plant 3 ounces to 150 feet of row. Water Cress 2 ounces will plant space about 9x9 feet in water.

127. BROAD LEAVED or UPLAND CRESS. This variety is extensively cultivated for market. It is sown from early Fall to late Spring. The leaves resemble Water Cress. It is considered a wholesome dish as a salad alone or as a combination salad.

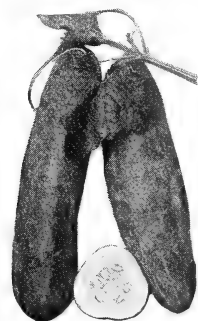

Prices: Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.50, postpaid.

128. WATER CRESS. Used extensively for salad making. About 75 days to edible or marketable condition.

Prices: Pkt. 10c; oz. 40c; ¼ lb. \$1.25; lb. \$4.50, postpaid.

Steckler's Cucumbers

Culture—Planting time, Southern States, Spring, February to July. Fall, August to September. Plant five ounces to 150 feet of row, 4 pounds to one acre. Sow in hills 3 to 4 feet apart. Each hill should be fertilized heavily with rich decomposed manure or other suitable fertilizer. Plant about 8 to 10 seeds to each hill. Approximate number of days to edible condition given after each variety.

Davis Perfect

129. DAVIS PERFECT. 70 days. Dark glossy green color, average length 10 to 12 inches. Seeds soft, cucumber tender and brittle. Unexcelled for quality, shape, color, productiveness, for the table or shipping.

130. EARLY CLUSTER. 50 days. Early short green, prickly cucumber, growing in clusters, used extensively for pickling purposes.

131. EARLIEST OF ALL. 50 days. Earliest of all cucumbers, dark green; average length about 7 inches. A prolific producer and maturing so early; very popular among market gardeners and for table use.

132. EARLY FORTUNE. 70 days. An excellent shipping variety, producing very attractive white spined fruits of rich dark green color. The fruits average uniformly about nine inches long, cylindrical or slightly tapered at ends. Seed cavity very small, flesh thick, crisp and tender. Recommended as one of the best shipping sorts yet introduced.

133. EVERBEARING. 70 days. Green colored, length about 5 inches, used extensively for pickling as well as sliced.

134. FROTSCHE'S NEW ORLEANS MARKET. 85 days. Very dark green, with white spine, cylindrical shaped, length averages 11 inches. One of the best and most popular among the Southern growers, for shipping and table use.

135. HENDERSON'S PERFECT WHITE SPINE. 85 days. Prolific, continuous producer of uniform, large and cylindrical cucumber. Excellent for slicing as well as marketing. A favorite wherever grown.

136. JAPANESE CLIMBING. 85 days. Strong, vigorous vines can be grown on trellis. Cucumbers round, about 10 inches long, thick and grown extensively. Good for shipping and table use.

137. KLONDYKE. 70 days. Very dark green, about 8 inches long, hardy vines, vigorous grower and producer. Many market gardeners will grow no other.

138. SNOW'S or HEINZ PICKLING. 52 days. An early maturing, small, dark green cucumber, round, square ended, grown largely for pickling. A very fine variety.

Prices on all above: Pkt. 10c; oz. 20c; ¼ lb. 40c; lb. \$1.35, postpaid.

139. STECKLER'S IMPROVED LONG GREEN. 70 days. Very dark green, length about 12 inches, one of the best and largest cucumbers on the market, none better. Excellent for table and shipping.

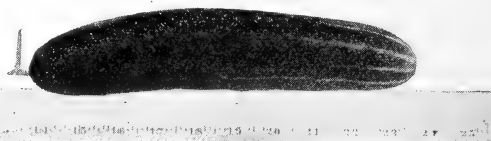

Prices: Pkt. 10c; oz. 25c; ¼ lb. 50c; lb. \$1.50, postpaid.

140. THE VAUGHAN. This variety is sometimes known as "Windermoor Wonder." It is emerald green in appearance and can be used either as a forcing variety or for field culture. Fruit attains a length of from 12 to 16 inches. Is a good keeper as well as a splendid table cucumber. Is prolific, uniform in shape and of a dark rich color. Recommended to our friends both for shipping and table use. Prices: Pkt. 15c; oz. 35c; ¼ lb. \$1.00; lb. \$3.25, postpaid.

141. WEST INDIA GHERKIN. (For Pickles.) 50 days. Very small, oval fruits, prickly sort, very distinct from all others and grown exclusively for pickles. Fruits should be picked when young and tender, the seed is distinctly smaller than that of other cucumbers and slow to germinate, requires from two to three weeks. Price: Pkt. 10c; oz. 20c; ¼ lb. 60c; lb. \$2.00, postpaid.

Kirby's Stays Green

The Vaughan or Windermoor Wonder

The seed is distinctly smaller than that of other cucumbers.

142. KIRBY'S STAYSGREEN. 70 days. The greenest of the Long White Spine varieties, hardy, large fruited, of excellent shape and uniform. A favorite among market gardeners. Used most extensively for shipping purposes.

Prices: Pkg. 10c; oz. 20c; ¼ lb. 40c; lb. \$1.35, postpaid.

143. NEW DELTUS. Fruit dark green, uniform in shape and size, square ended and 10 to 12 inches in length. Seeds do not begin to form until the cucumbers are quite large. Price: Pkg. 20c; oz. 40c; ¼ lb. \$1.40; lb. \$5.00, postpaid.

STECKLER'S DANDELION

Culture—Sow early in spring in very warm, rich soil, in drills 18 inches apart; thin to five inches apart and cultivate well; they will be fit for cutting the next spring. When grown for the roots, sow in September and cultivate well during the fall and the following summer; the roots will be fit to dig in October.

144. IMPROVED THICK-LEAVED. Unsurpassed in thickness of leaf and deep green color. Compact and forms upright regular tuft in the middle. Used extensively like Mustard, Spinach and other greens.

Prices: Pkt. 10c; oz. 60c; ¼ lb. \$1.75; lb. \$6.00, postpaid.

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

Steckler's Egg Plants

Culture—Planting time, Southern States. Seeds, Spring, January to March; in hot beds. In open ground April to June. Fall, September to October. Plant one ounce of seed to 150 feet of row. Approximate time to edible condition is given after name of each variety, this varies, due to climatic and soil conditions.

Half pound of seed will furnish enough plants for one acre.

145. BLACK BEAUTY. 125 days. Rich shiny purplish black color, heavy producing plants, hardy, grown very extensively by small and large gardeners, for shipping and table use.

146. FROTSCHER'S NEW ORLEANS MARKET or LARGE PURPLE. 130 days. This is the variety mainly grown here, large, oval in shape and of a dark purple color and very productive. Southern grown seed of this as a good many tropical or sub tropical vegetables, is preferable to Northern Seed, as it will germinate more readily and the plant will last longer during the hot season. Best variety for shipping and home use.

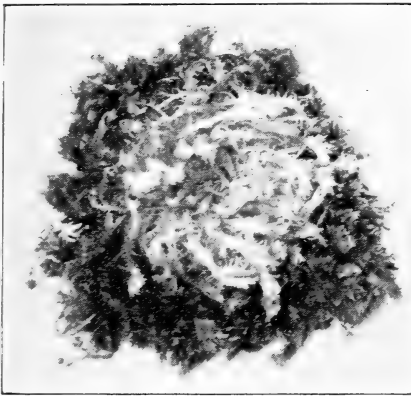

147. IMPROVED NEW YORK SPINELESS. 115 days. Large sized very dark purple fruits. Plants produce about 8 to 10 egg plants, a very popular variety.

148. STECKLER'S HIGH BUSH. 130 days. Very large, dark rich, purple fruits of excellent quality. Produces 6 to 8 fruits, growing in popularity every year.

Prices on above: Pkt. 10c; oz. 40c; ¼ lb. \$1.50; lb. \$5.00, postpaid.

New Orleans Market Egg Plant

Italian-Red-Ribbed Endive

Steckler's Endive

Culture—Planting time, Southern States. Spring, February to June; Fall, September to November. Plant one ounce to 150 feet of row, 3 lbs. to the acre. Sow either broadcast and transplant like lettuce or in rows one foot apart and thinned to 8 inches apart, used for salads. Approximate time to edible condition of the two varieties is 75 days. Bleached by tying up leaves or covering plants.

149. BROAD LEAVED OR BATAVIAN ESCAROLLE. Broad flat, deep green leaves, excellent flavor, very hardy, grown very extensively throughout the South, both for table and market.

150. ITALIAN RED RIBBED or GREEN CURLED (Panacalier). Hardy, vigorous growing endive with bright, deep green leaves, the mid-ribs of the outer leaves are usually tinged with rose. The dense mass of deeply divided leaves formed in the center blanches very readily to a rich cream color. Highly esteemed for shipping and table use.

Prices: Pkt. 10c; oz. 15c; ¼ lb. 50c; lb. \$1.25, postpaid.

STECKLER'S FENNEL (Italian or Florence, Imported)

151. Culture—Planting time, Southern States. Spring, March to June; Fall, August to November. Plant 1¼ oz. to 150 feet of row. Sow in rich well prepared soil in drills 2 feet apart and cover ¼ to ½ inch with earth, when plants are 2 inches high, thin to 10 inches apart in row, blanch the stems. Used extensively by Italians of New Orleans and vicinity and for shipping to Eastern markets, used very much the same as celery. Growing in popularity.

Prices: Pkt. 10c; oz. 15c; ¼ lb. 50c; lb. \$1.50, postpaid.

STECKLER'S GARLIC (Sets)

152. Culture—Planting time, Southern States. Spring, January to June; Fall, September to November. Plant one pound to 150 feet of row. 300 pounds per acre. Plant 6 inches apart and about one inch deep in rows 2 to 3 feet apart. Used very extensively throughout the South for flavoring stews, roasts and various other dishes. About 90 days to edible condition.

Prices: 1 lb. 35c; 3 lbs. \$1.00, postpaid. Not prepaid, 10 lbs. \$2.50; 100 lbs. \$20.00.

Garlic

STECKLER'S GOURDS

Culture—Planting time, Southern States. Spring, March to June; grown very easily, makes ornamental vines, usually grown on trellis or fence. Do not plant near pumpkins or squash as their taste will be affected.

153. DISHCLOTH. When fully ripe the skin can be easily removed and the sponge-like interior cleaned and dried, then used as dish rag.

154. NEST EGG. Resembles a hen's egg in color, form and size, does not crack and are uninjured by cold or wet, used as a nest egg and for darning purposes.

155. DIPPER. Long handled gourd, dippers are made from this variety.

156. ORNAMENTAL. Planted for ornamental vines, produces a variety of small colored gourds.

157. ITALIAN or SWEET GOURD (Cucuzzi Caravazzi). Used same as squash or pumpkin, grows to length of 24 to 36 inches, resembles that of a bat, blunt at one end and tapering to the other end. One of the finest vegetables, extensively used by Louisiana gardeners, principally by the Italian element.

Prices on above: Pkt. 10c; oz. 25c, postpaid.

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

Steckler's Lettuce

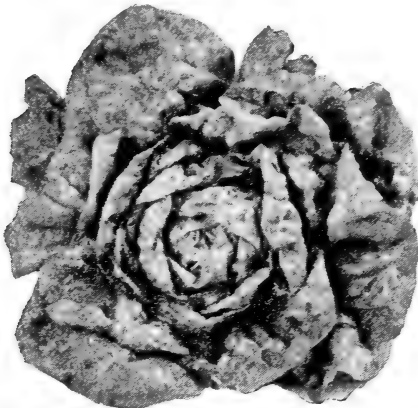

Culture—Planting time, Southern States. Spring, January to June; Fall, September to November. Plant one ounce to 150 feet of row, 3 pounds to one acre. If planted during hot weather, soak seed for 2 hours in water, preferably on ice if convenient, and wrap in damp cloth. Keep for six days in damp cloth until sprouted, then plant. Ants very often carry away the seed before sprouting but this treatment stops it. If weather is cool and damp the above treatment is unnecessary. When sown direct, sow broadcast, when large enough to transplant, plant 10 inches apart in rows 1 foot apart. Approximate time to maturity is given after each variety. This varies with soil and climatic conditions.

176. GRAND RAPIDS. 65 days. Non-heading, leaves crisp, light green, curled, fringed. Delightful flavor. Grown extensively in home gardens as well as by market gardeners under glass.

177. IMPROVED ROYAL CABBAGE. 80 days. Forms large crisp, solid heads. Stands heat well, especially desirable for Southern gardeners. Only variety planted in summer.

178. STECKLER'S SELECTED BIG BOSTON. 70 days. Extra large, round, very firm, light green heads. Majority of market gardeners as well as home gardeners in South are growing this variety for shipment and table use.

Price: Pkt. 10c; oz. 20c; ¼ lb. 50c; lb. \$1.50, postpaid.

New York Wonderful

179. NEW CHICKEN

LETTUCE. We highly recommend this for chickens or rabbit feeding, very productive, when cut, starts right in to grow again. This variety of lettuce does not head but sends up stalks 3 to 4 feet high. Heavily leaved which can be pulled off like Kale.

Price: Pkt. 10c; oz. 20c; ¼ lb. 50c; lb. \$1.50, postpaid.

180. ICEBERG. 70 days. Heading, curled, medium size, crisp, green fringed leaves enclosing crisp, white interior. A very popular variety. Very popular for shipping and table use. Price: Pkt. 10c; oz. 20c; ¼ lb. 60c; lb. \$2.00, postpaid.

Steckler's Big Boston

181. LARGE SALAMANDER. 75 days. Heading, very large, light green, compact, often weighing from 2 to 3 pounds. Stands heat and drought well. Excellent for shipping.

182. STECKLER'S SPECIAL WHITE. 80 days. Light green, compact heads, grown extensively as a winter lettuce. We highly recommend this variety. Prices: Pkt. 10c; oz. 20c; ¼ lb. 60c; lb. \$2.00, postpaid.

183. ROMAINE or PARIS WHITE COS. 70 days. Loose spoon shaped leaves, loose heads. Bleached by tying up leaves. Delightful tasting, an excellent variety both for market gardeners and home gardens.

184. STECKLER'S NEW YORK OR WONDERFUL. 80 days. Crisp, large heads, dark green colored leaves. Produces most compact heads, the best and most popular variety on the market, often marketed as Improved Iceberg. Excellent for shipping.

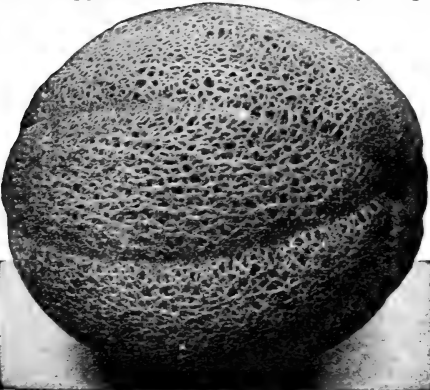

Prices: Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.50, postpaid.

Romaine or Paris White Cos

Steckler's Melons Muskmelon or Cantaloupe

Culture—Planting time, Southern States. Spring, February to June. Plant in rich, sandy loam soil. Mix well rotted manure in each hill. Plant 10 to 12 seeds in each hill. Hills 5 feet apart each way. When plants are nicely started, thin to about 4 plants to each hill. Two ounces is required to 150 feet of row. Four pounds to one acre. Approximate time to maturity is given after each variety. This varies with climatic and soil conditions.

Hale's Best

185. BANANA. 78 days. Yellow flesh, about 18 inches long, 3 to 4 inches in diameter, curved end, ribbed, a popular variety in the South.

186. GOLDEN BEAUTY CASABA. 80 days. Very large, golden yellow flesh, ribbed, one of the best on the market, we recommend this variety very highly.

187. PERFECTION. 82 days. Thick, green flesh, very large, excellent producer in great demand in markets and one of the best.

188. HALE'S BEST. A new variety, very early and recommended highly for long distance shipping. Salmon flesh of exceptional thickness, shape is oval, with heavy netting and prominent ribs.

189. MONTREAL MARKET (green flesh.) This melon is of a splendid size, sometimes averaging 20 to 25 pounds and possesses a very delicious flavor. Fruit matures in about 80 days and is green in color, flesh is light green. A very prolific variety and splendid for shipping as well as home use.

190. STECKLER'S EDEN GEM. 70 days. Salmon color flesh, large, practically no ribs, almost round. We recommend this variety very highly for table and shipping.

191. STECKLER'S PINK FLESH. 78 days. Oval shape, about 5 inches in diameter, small seed cavity, deep pink flesh, wonderful tasting, grown extensively for table and shipping.

Steckler's Peppers

Culture—Planting time, Southern States. Seed, Spring, December to March in hot beds, in open ground March to June; Fall, August to November in open ground. 2 ounces will produce about 1500 plants, 6 ounces to one acre. Open ground planting $1\frac{1}{2}$ feet apart and $1\frac{1}{2}$ to 2 feet between rows. Do not plant two varieties close together as they mix easily. Production of peppers in the South is one of our large industries. Approximate time to edible condition is given after each variety. This varies with climatic and soil conditions.

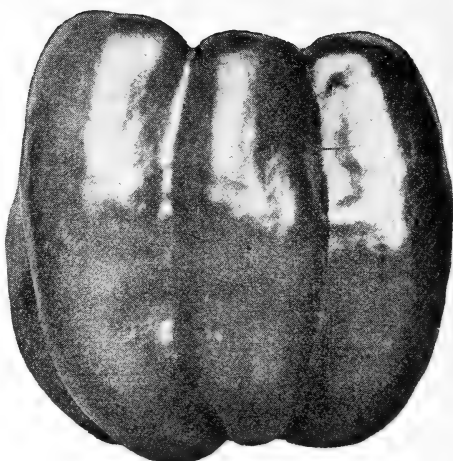

259. BIRDS EYE. 110 days. Very small red pepper, plant 2 feet high, very hot, used for seasoning, grown in home gardens extensively.

260. OHIO CRIMSON. 130 days. Similar to Ruby King, but broader, longer and deeper fruited like Chinese Giant, a monster about $4\frac{1}{2}$ inches long by 4 inches wide, but not so large as Chinese Giant. Bush strong, dark, large leaved, very productive in fruit, frequently bearing 7 to 8 fruits at once and covered by a succession of smaller fruit.

Prices: Pkt. 10c; oz. 60c; $\frac{1}{4}$ lb. \$2.00; lb. \$7.00, postpaid.

261. CHINESE GIANT. 130 days. Very large scarlet red peppers, mild and thick meat, 4 inches in diameter, plants 2 feet high, one of our best and most popular varieties for market and home gardens.

Prices: Pkt. 10c; oz. 60c; $\frac{1}{4}$ lb. \$2.00; lb. \$7.50, postpaid.

Chinese Giant

Long Red Cayenne

232. FROTSCHER'S TOBASCO. 125 days. Small pointed red peppers, bush 3 feet high. Prolific producer, very hot, the nationally known Tobasco Sauce is made from this excellent variety.

Prices: Pkt. 10c; oz. 60c; $\frac{1}{4}$ lb. \$2.00; lb. \$7.00, postpaid.

263. LONG RED CAYENNE. 110 days. Pods 4 inches long, twisted and pointed. Very pungent, bush about 2 feet tall, a favorite with many Southern gardeners.

264. RUBY KING. 110 days. A vigorous and productive plant $2\frac{1}{2}$ feet high. Peppers bright scarlet color when ripe, a very large and excellent variety, a general favorite among gardeners.

265. STECKLER'S ROYAL KING. 110 days. A very large variety, bright scarlet color when ripe, bush $2\frac{1}{2}$ feet, one of the best and highly recommended by us. A favorite.

Prices: Pkt. 10c; oz. 40c; $\frac{1}{4}$ lb. \$1.25; lb. \$4.00, postpaid.

266. PERFECTION. 110 days. Pimento type pepper, bush $2\frac{1}{2}$ feet high, grown extensively for canning, very popular and large.

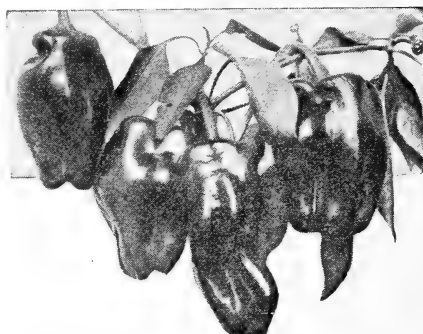

Prices: Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50, postpaid.

267. RUBY GIANT. 110 days. Bright scarlet color when ripe, very large and mild tasting, bush $2\frac{1}{2}$ feet high. Many gardeners will plant no other. An excellent market and home garden variety.

Prices: Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. \$1.25; lb. \$4.00, postpaid.

268. WORLD BEATER. 90 days. A large red pepper, thick meat, mild tasting, used extensively and well liked.

Prices: Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. \$1.25; lb. \$4.50, postpaid.

World Beater

Steckler's Irish Potatoes

Culture—Planting time Southern States, Spring, January to April; Fall, (small seed potatoes), August and September. Potatoes thrive best in a light, dry, rich soil. For spring planting large potatoes are cut so that a good sized piece will contain 3 eyes. The pieces are planted in rows 2 to 3 feet apart and hills 1 to 2 feet apart in row. Fall seed potatoes are small and are planted whole. All varieties listed mature in about 85 to 100 days.

Dust plants with Arsenate of Lead, powdered form, every 2 weeks after plants are 6 inches high for control of Potato Bugs.

269. EARLY BLISS RED TRIUMPHS. Certified selected stock. Light red, medium size, round, uniform shape, eyes slightly depressed, an excellent variety for shipping. Grown very extensively both for home and market.

Prices: Peck, (15 lbs.) \$1.25; bu. (60 lbs.) \$4.00; sack (120 lbs.) \$7.50. Not prepaid.

270. WHITE STAR, selected stock. Long, oblong shaped, white variety, an excellent producer and very popular. Keeps well and is one of our best varieties. One of the leading varieties for home and shipping purposes.

Prices: Peck, (15 lbs.) \$1.00; bu. (60 lbs.) \$3.25; sack, (150 lbs.) \$6.00. Not prepaid.

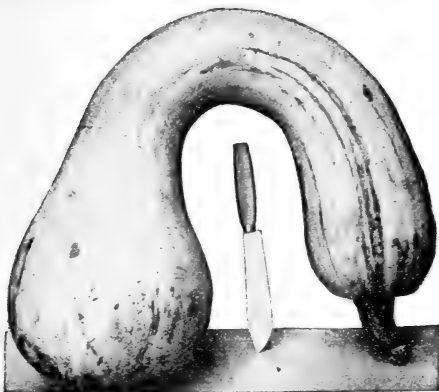

Steckler's Sweet Potatoes

271. SEED SWEET POTATOES. Porto Rican Yams—The universal potato of the South, pink skin, yellow flesh, very good keeper, abundant bearer, very sweet. Price: \$3.00 per bu. of 50 lbs. Prices on larger quantities on application.

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

Steckler's Pumpkins

Culture—Southern States, planting time, Spring, March to July. Usually planted in corn fields; when grown as separate crop, plant in hills (about 10 seeds to the hill) about 8 to 10 feet apart each way, when started, thin to 3 or 4 plants. When leaves die, cut pumpkins from vines, leaving about 3 or 4 inches of stem and store in dry place, avoid bruising. One pound to 300 hills, 4 pounds to an acre. Approximate number of days to edible condition is given after each variety. This varies with climatic and soil conditions.

Frotscher's Green Striped Cashaw

274. JAPANESE PIE. 80 days. Color when matured, dark green, similar shape to Cashaw but larger. Yellow flesh, very productive, an excellent variety for all purposes.

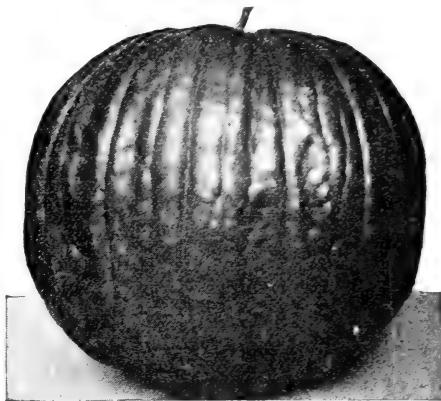

275. YELLOW SWEET POTATO PIE. 80 days. Golden yellow skin, pear shape, flesh thick and white, excellent keeper, grown extensively and popular. Prices: Pkt. 10c; oz. 20c; ¼ lb. 45c; lb. \$1.25, post-paid.

276. FROTSCHER'S GREEN STRIPED CASHAW. 90 days. Large white with green stripe, with crooked neck; flesh light yellow, thick, coarse, but sweet. Planted more extensively in the South than any other variety, very popular. One of the best for pie making and an excellent keeper.

272. CONNECTICUT FIELD. 80 days. Large, smooth, oval shaped, orange yellow color, very productive. Grown extensively throughout the South, mainly in corn-field, splendid for table and feeding stock.

273. LARGE CHEESE. 80 days. Bright orange color, shaped like a cheese, very large and indented top and bottom. Excellent quality, well liked wherever grown.

Prices: Pkt. 10c; oz. 15c; ¼ lb. 25c; lb. 75c, post-paid.

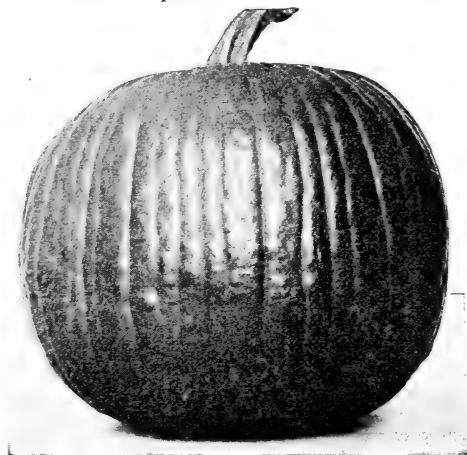

Connecticut Field

277. GOLDEN YELLOW MAMMOTH. 100 days. Bright golden yellow skin, thick flesh, excellent quality, splendid keeper. Weight 50 to 80 lbs., cannot be beaten as a pie pumpkin and for stock feeding.

278. YELLOW CASHAW. 100 days. Shaped like green Cashaw, often weighing 40 to 50 pounds. A favorite for pie making. Prices: Pkt. 10c; oz. 25c; ¼ lb. 60c; lb. \$1.50, post-paid.

279. SMALL SUGAR. 75 days. Deep orange yellow skin, averaging 10 inches in diameter, flesh fine grain, sweet and excellent keeper, a favorite among many gardeners for table and stock feeding.

Prices: Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00, post-paid.

Golden Yellow Mammoth

Steckler's Radishes

Culture—Planting time, Southern States, Spring, January to June; Fall, August to December. Plant 3 ounces to 150 feet of row; 8 lbs. to the acre, about 10 inches apart, cover lightly. If too thick radishes do not form properly but crowd each other. Plants should be about 2½ inches apart, allowing proper space for development of Radish. Radishes constitute a very large crop for Northern markets. Approximate time to edible condition is given after each variety. This varies due to climatic and soil conditions.

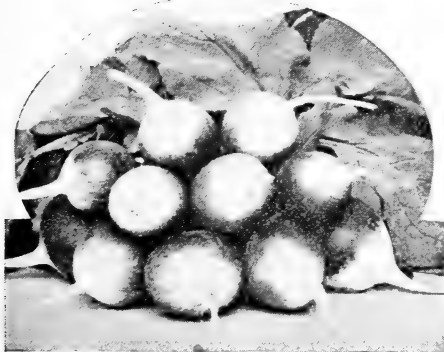

280. BLACK SPANISH (Winter). 30 days. Outside color black, flesh white, about 8 inches long. Planted very extensively for winter production.

281. BRIGHTEST SCARLET OR THREE QUARTER LONG. 25 days. Bright scarlet color, average about 6 inches long, a favorite.

282. CHARTIER. 35 days. Bright scarlet color, about 7½ inches long, excellent tasting, grown extensively.

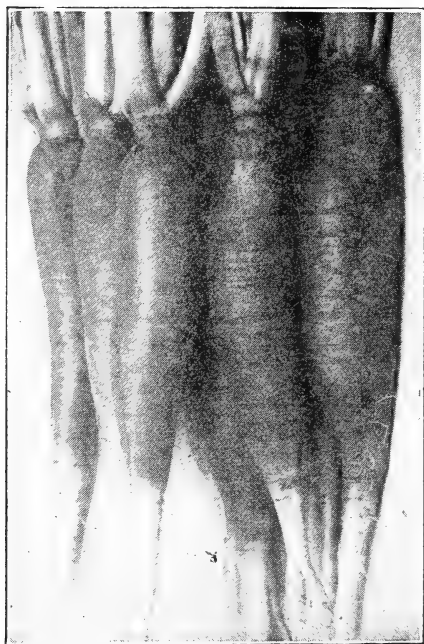

283. CHINESE ROSE (Winter). 30 days. Stump-rooted bright deep rose color, about 5 inches in length, one of the best winter radishes on the market.

284. COOPER'S SPARKLER TURNIP WHITE TIP. 20 days. One of the best early Radishes for the home garden and a great favorite in large markets for early planting outdoors. Roots are nearly round, slightly flattened on the underside. Color is very bright, deep rose scarlet with a distinct white tip. Flesh is white and of the best quality.

Cooper's Sparkler Turnip White Tip

Radishes—Continued

Early Long Scarlet

285. CRIMSON GIANT TURNIP RADISH. 25 days. Very large, round, scarlet color, good shipper, grown very extensively and very popular.

286. EARLY DEEP SCARLET TURNIP. 22 days. Small, round, deep scarlet color, mild taste, very popular for home garden as well as market.

287. EARLY LONG SCARLET SHORT TOP IMPROVED. 25 days. Carmine red color, about 7½ inches long. Grown extensively by Southern gardeners.

288. FRENCH BREAKFAST. 22 days. About 1½ inches long and about ¾ inch in diameter, deep scarlet color, except a little white around root. We recommend this variety very highly.

289. GLASS OR CINCINNATI. 25 days. Small tops, 6 to 7 inches long, bright scarlet color, a very popular market variety.

290. ICICLE. 25 days. About 5 inches long, white, brittle and has mild flavor, well liked and grown extensively in South.

291. ROSY GEM. 25 days. Deep scarlet on top and white on bottom, perfectly round, excellent taste. A favorite.

292. SCARLET HALF LONG FRENCH. 25 days. About 3 in. long, bright scarlet color, very brittle and tender, an excellent variety.

293. SAXA (New). A new European variety introduced in the United States. Very early, exceedingly round or ball shaped, bright scarlet color, rapid growth, short top and small tap root. Very tender, crisp and mild in flavor. We recommend it highly for home and shipping purposes.

294. WHITE STRASSBURG. 25 days. Oblong shape, white, firm, brittle and tender. About 4 inches long and 1½ inches in diameter. A very popular variety wherever grown. Prices on all the above: Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. 90c; 5 lbs. \$4.00, postpaid.

STECKLER'S RHUBARB or Pie Plant Roots

295. STECKLER'S RHUBARB or PIE PLANT ROOTS.

Prices: Seed, Pkt. 10c; oz. 30c; ¼ lb. 75c, postpaid.

Prices: Roots, 2 years old each, 15c; 10 for \$1.00; 100 for \$4.00, Postpaid. Not prepaid, 1000 for \$12.00.

Culture—Planting time, Southern States, November to February. Plant roots 2 feet apart each way. Mix plenty of well rotted manure in each hill. Used extensively for pies and sauce. Delicious flavor.

STECKLER'S ROQUETTE or Rocket Salad

296. STECKLER'S ROQUETTE or ROCKET SALAD.

Prices: Pkt. 10c; oz. 25c; ¼ lb. 75c, postpaid.

Culture—Planting time Southern States, Spring, January to June; Fall, August to December. Plant 1½ ounces to 150 feet of row. Sow 15 inches apart each way, leaves are used for salad similar to lettuce. Ready for cutting about 45 days. Very delicious.

STECKLER'S SALSIFY or Oyster Plant

297. Sandwich Island.

Prices: Pkt. 10c; oz. 25c; ¼ lb. 75c; lb. \$2.25, postpaid.

Culture—Planting time, Southern States, Spring, January to June; Fall, August to December. Plant 2½ ounces to 150 feet of row, 8 pounds per acre. Spade ground deeply and mix with well pulverized manure, sow in rows 10 inches apart. Grown in both large and small Southern gardens. Edible condition 150 days after planting. Taste similar to oysters.

STECKLER'S SORREL (Broadleaved)

298. STECKLER'S SORREL (Broadleaved).

Prices: Pkt. 10c; oz. 25c; ¼ lb. 75c, postpaid.

Culture—Planting time, Southern States, Spring, January to April; Fall, September to December. Plant 2½ ounces to 150 feet of row. Sow in rows one foot apart. Used like Spinach as well as in salad and in soup. Edible condition about 85 days after planting. Planted in many small gardens throughout the South.

Steckler's Salsify

STECKLER'S SPINACH

Culture—Planting time, Southern States. Spring, January to June; Fall, (main crop), September to December. Plant 3 ounces to 150 feet of row, 10 pounds per acre. Sown broadcast in fields, or in rows about 12 inches apart (small gardens). There is no better greens produced than Spinach. Rich, moist ground is best and grows better when season has cool nights. Approximate time to edible condition is given after each variety. This varies with climatic conditions and soil.

Broad Leaved Flanders Spinach

299. BROAD LEAVED FLANDERS. 70 days. Very large, broad leaves, grows erect, very extensively grown, fine flavor.

300. MONSTROUS VIROFLAY OR THICK LEAVED. 58 days. Monstrous leaves, the largest of all varieties. Requires rich soil, an excellent sort.

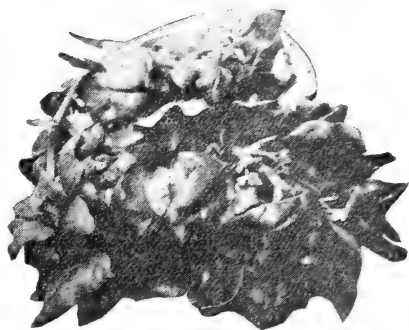

Prices: Ounce pkt. 10c; ¼ lb. 25c; lb. 50c; 5 lbs. \$2.00, postpaid.
301. EXTRA LARGE LEAVED SAVOY. 60 days. Very large, thick leaves, slightly curled. The best and most extensively grown variety for market.

302. KING OF DENMARK. 70 days. Long, very thick leaves, dark colored, an excellent variety and very popular.

303. STECKLER'S FULLBASKET. 60 days. Leaves often 20 inches across, very tender and of excellent flavor. We recommend this variety very highly.

Prices: Ounce pkt. 10c; ¼ lb. 30c; lb. 60c; 5 lbs. \$2.50, postpaid.
304. NEW ZEALAND. 90 days. Dark green, thick succulent, heat resistant, grows well all summer, very popular.

Prices: Pkt. 10c; oz. 15c; ¼ lb. 35c; lb. \$1.00; 5 lbs. \$4.50, postpaid.

New Zealand Spinach

Steckler's Squash

Culture—Planting time, Southern States. Spring, March to July; Fall, August to November. Plant 1½ ozs. to 150 feet of row, 3 to 4 lbs. per acre. Prepare hills by mixing well rotted manure in each hill and pulverizing thoroughly. Plant about 6 to 8 seeds in each hill, summer varieties, hills should be 3 to 4 feet apart each way; winter varieties 6 to 8 feet. When well started thin to about 3 plants to each hill. Do not bruise when gathering. Approximate number of days to edible condition is given after each variety. This varies, due to climatic and soil conditions.

305. EARLY WHITE BUSH or PATTY PAN. 70 days. Vine dwarf in habit, produces round scalloped squash about 4 inches thick and about 9 inches in diameter. The most popular variety in the South.

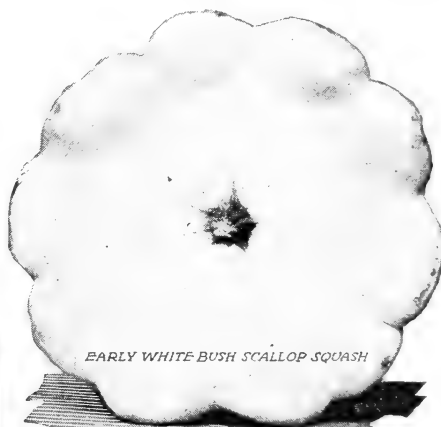

306. GOLDEN CUSTARD. 80 days. Large golden yellow, fine quality squash. Excellent keeping, none better for home use. No garden complete without it.

307. LONG YELLOW OR SUMMER CROOKNECK. 80 days. Produces crooked shaped yellow squash. Thick, fine quality flesh. Very popular.

Prices: Pkt. 10c; oz. 15c; ¼ lb. 40c; lb. \$1.25; 5 lbs. \$5.50, postpaid.

308. MAMMOTH CHILLI. 70 days. The largest of all squash. Rich orange yellow, skin smooth, excellent keeper, almost every garden has some of this variety.

309. BOSTON MARROW. 95 days. A meaty or thick fleshed, very productive variety, suitable for the factory. Fruits keep very well, color bright orange shading to lighter color of flesh. A fine squash for pies and winter use.

EARLY WHITE BUSH SCALLOP SQUASH

310. COCOZELLE or ITALIAN GREEN STRIPED. 90 days. Fruit somewhat shaped like a Banana Cantaloupe, 12 to 15 inches long and about 5 inches thick. When young, dark green, afterwards light yellow. Excellent for slicing and frying like eggplant.

Prices: Pkt. 10c; oz. 20c; ¼ lb. 50c; lb. \$1.50; 5 lbs. \$6.50, postpaid.

Improved Havana Tobacco

Steckler's Tobacco

Culture—Tobacco in this part of the country should be started in a hot bed in March and treated same as tomatoes. One ounce, 5000 plants.

311. CONNECTICUT SEED LEAF. A well known American variety.

312. IMPROVED WHITE BURLEY. This is especially valuable to manufacturers either of cut or plug tobacco, it is often used for wrappers.

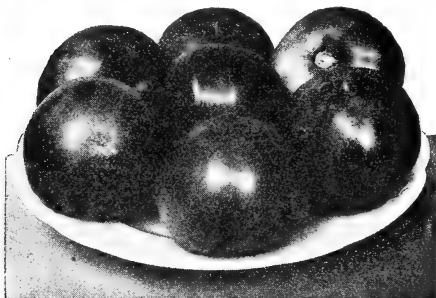

313. IMPROVED HAVANA. We import from one of the principal growers the finest and purest strain of Vuelta de Abajo which is considered the best of Havana varieties.

Prices: Pkt. 10c; oz. 75c; ¼ lb. \$2.00; lb. \$7.10, postpaid.

Steckler's Tomatoes

Culture—Planting time, Southern States. Seed, Spring, December to March in hot bed; in open ground to June; Fall, September to November in open ground. Plant $\frac{1}{2}$ ounce in 150 feet of row. One ounce will produce about 3000 plants. Transplant from hot bed when plants are about 6 inches high to open ground, about 3 to 4 feet apart each way. Tomatoes require rich, well pulverized soil. If danger of frost is not over when transplanted, plants must be covered at night whenever there is danger of frost. To protect from insects dust with Arsenate of Lead, powdered form, about 2 weeks after transplanting and at about 2 week intervals thereafter. Approximate number of days from time of planting seed to edible condition is given after each variety. This varies due to climatic and soil conditions.

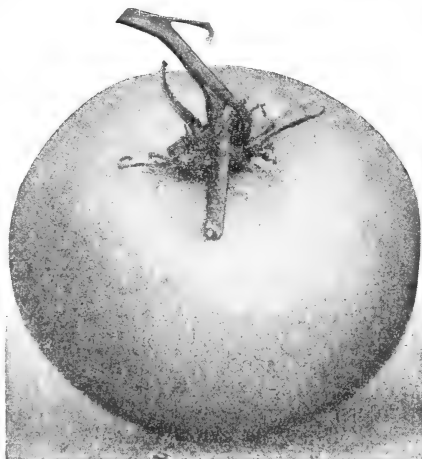

June Pink

- 319. GREATER BALTIMORE.** 120 days. Round, red solid fruit, medium size, heavy producer. We highly recommend this variety.
320. RED ROCK. 120 days. Very solid, red color, large, smooth fruit, no superior in quality and flavor. Planted extensively.
 Prices: Pkt. 10c; $\frac{1}{2}$ oz. 20c; oz. 35c; $\frac{1}{4}$ lb. \$1.15; lb. \$4.30; 5 lbs. \$18.50, postpaid.

Ponderosa

- 321. JUNE PINK.** 100 days. Purplish pink, prolific producer, hardy vines, an excellent variety.
322. GULF STATES MARKET. 120 days. Purple, globe shaped, excellent quality fruit. Good shipper, a favorite for Southern gardeners.
323. LIVINGSTON'S GLOBE. 120 days. Smooth, purplish red color, good size, firm flesh. Prolific producer, an excellent variety.
 Prices: Pkt. 10c; $\frac{1}{2}$ oz. 25c; oz. 45c; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00; 5 lbs. \$21.00, postpaid.
324. LIVINGSTON'S FAVORITE. 120 days. Bright red, wonderful shape and flavor, very large, good producer, truly a favorite variety.
325. LIVINGSTON'S STONE. 100 days. Bright red, good size, smooth tomato. Solid flesh, excellent for canning, recommended highly.
326. SPARK'S EARLIANA. 100 days. Large red, smooth tomato, nearly round, foliage small, grown extensively for canning. We recommend this variety very highly for all purposes.
327. STECKLER'S NEW STONE. 125 days. Bright red, solid, smooth fruit, prolific producer, excellent quality. One of the best and most extensively grown varieties.
 Prices: Pkt. 10c; $\frac{1}{2}$ oz. 20c; oz. 30c; $\frac{1}{4}$ lb. 90c; lb. \$3.00; 5 lbs. \$12.50, postpaid.
328. MARGLOIE. The newest and best Tomato. Produces a heavy crop of highest quality fruit. Cannery are especially pleased with this new variety.
329. NORTON'S WILT RESISTANT. 135 days. Heavy bearer of large smooth, red fruit. A favorite variety for home gardens. Price: Pkt. 10c; $\frac{1}{2}$ oz. 30c; oz. 50c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.00, postpaid.
330. CRIMSON PONDEROSA. 125 days. Very large, very firm, crimson color, few seeds, prolific producer, one of our best varieties.
331. YELLOW PONDEROSA. 125 days. Rich golden yellow color, similar in size and shape and growth to Crimson Ponderosa. Very popular.
 Prices: Pkt. 10c; $\frac{1}{2}$ oz. 30c; oz. 50c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.00; postpaid.
332. RED AND YELLOW PEAR SHAPED. Two separate varieties and sold separately. 100 days. Pear-shaped, small size fruits, good quality, grown in many Southern gardens.
 Prices: Pkt. 10c; $\frac{1}{2}$ oz. 30c; oz. 50c; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00, postpaid.

Livingston's Globe

Marglobe

STECKLER'S WHITE SHALLOTS

Culture—Planted August to March. For home consumption and Northern markets. About 6 bushels per acre in four foot rows. The quantity to be expected from an acre, if planted in field culture, 4 foot rows, would be from 50 to 60 barrels, but if planted, as is done near New Orleans, in 2 foot rows, 100 to 125 barrels, if planted in August and September. If planted later, they do not multiply so well.

- 350. STECKLER'S WHITE SHALLOTS.** Price: lb. 35c; 3 lbs. \$1.00, postpaid. Not prepaid, peck (8 lbs.) \$2.00, bushel (32 lbs.) \$6.50.

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

Steckler's Turnips

Culture—Planting time, Spring, January to June; Fall, September to December. Plant $1\frac{1}{2}$ ounce to 150 foot rows, 4 pounds to one acre. Sow broadcast, or in rows, about $1\frac{1}{2}$ to 2 feet apart. Cover about a half inch, thin out as overcrowding hinders proper development. Turnips grow better in a light, rich soil. Turnips and Rutabagas are also used extensively for feeding stock, however, do not feed them to milch cows as it affects the taste of the milk. The approximate number of days to maturity is given after each variety. This varies with climatic and soil conditions.

333. AMBER GLOBE. 70 days. Globe shaped, large, attractive color, very productive. Used extensively, both for shipping and table use.

334. EARLY PURPLE TOP STRAP-LEAVED. 50 days. Medium size, flat, fine grained and tender, an excellent variety.

335. EARLY WHITE FLAT DUTCH. 50 days. Flat, white, medium size. Excellent quality, one of our best varieties for table and market.

333. EXTRA EARLY WHITE EGG. 60 days. Egg-shaped, white, thick skin, firm flesh. A good keeper, a popular variety.

337. IMPROVED PURPLE TOP RUTABAGA. 80 days. Oblong shape, yellow flesh, very solid, used extensively for table as well as stock feeding.

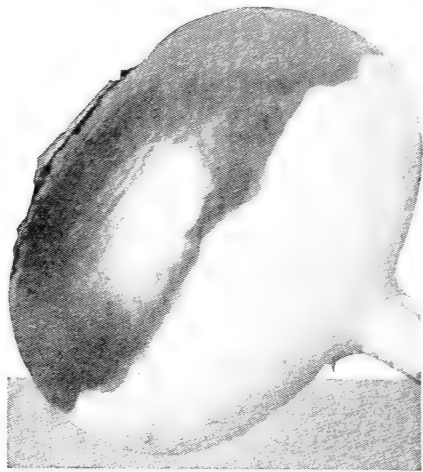

338. LARGE COW HORN. 90 days. Large, white horn-shaped turnip, average about 9 inches long, very large producer, an excellent variety.

339. LARGE WHITE GLOBE. 80 days. Globe shaped, pure white skin. In rich soil sometimes weighs 12 pounds, a very popular variety for home and shipping purposes.

340. PURPLE TOP WHITE GLOBE TURNIP (Imported). Same as above except has purple Top and not so large. Recommended for home and shipping.

341. PURPLE TOP YELLOW ABERDEEN. 70 days. Medium sized, round, yellow flesh, firm, very hardy and productive. A popular variety among many Southern farmers.

342. SEVEN TOP. 70 days. Tops very large and makes excellent greens and salads. Very hardy roots, an excellent variety for the South.

Purple Top White Globe

Japanese Turnip

343. SNOWBALL. A splendid extra early white skinned and fleshed Turnip, crisp and snowy white, fine for spring planting. Very quick in growth and highly recommended.

Prices: Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 25c; lb. 75c; 5 lbs. \$3.00, postpaid. Not prepaid, 10 lb. lots and over at 50c per lb.

344. PURPLE TOP WHITE GLOBE. (Eastern). 60 days. Large, globe shaped, white turnip with purple top. One of our best and most popular varieties.

345. EXTRA EARLY PURPLE TOP MILAN. 40 days. Flat, smooth, medium size, bright purple top. A favorite wherever grown.

Prices: Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25; 5 lbs. \$5.00, postpaid. Not prepaid, 10 lb. lots and over at 75c per lb.

346. STECKLER'S JAPANESE TURNIP (Tennoji). 70 days. Large white, semi-flat, heavy producer, good keeper, used both for table and stock. Louse and Disease resistant.

347. STECKLER'S JAPANESE TURNIP (Shogoin). Wonderful new turnip, one of the South's most popular varieties for summer and fall planting. Roots white, almost globe shape, free of insect attacks and are splendid for greens. has mild flavor and will grow in the hottest and driest weather.

Prices: Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 50c; lb. \$1.75; 5 lbs. \$7.50, postpaid. Not prepaid, 10 lb. lots and over at \$1.25 per lb.

STECKLER'S VEGETABLE PEAR, Chayote or Merliton

348. STECKLER'S VEGETABLE PEAR (Chayote or Merliton).

Prices: Each 30c; dozen \$3.00, postpaid.

Culture—Planting time, Southern States, Spring, March to May. The Vegetable Pear makes an excellent dish whether creamed, fried, stuffed, baked with cheese or salad. It is grown on a long ornamental vine similar to the gourd to which family it belongs. The vine is usually trailed on a trellis or fence. Plant the whole pear with broad end down, leaving small end slightly exposed. Never plant less than two for successful results of production.

HOME GROWN VEGETABLE PLANTS

Ready October 15th to February 15th.

Steckler's Field Seeds

All prices are subject to market fluctuations.

NOTE:—The Field Seeds listed are selected, after over 100 years of study and experience, for their special adaptability to the climates of the South and are of the best quality.

Steckler's Beans, Velvet and Soy for Fertilizer

Planting time, Southern States, March to August.

351. BILOXI (Soy). Bush grows upright about 5½ feet with very heavy foliage, besides producing excellent food for grazing and for hogging down with corn and for ensilage, it is one of the best fertilizing plants in existence. We recommend this variety very highly. 6 to 8 pounds will plant one acre in rows about 3 feet apart. 1 to 2 inches deep. 60 lbs. per bushel. Prices: 1b. 35c; 2 lbs. 60c, postpaid.

352. EXTRA EARLY SPECKLED VELVET or 90 Day. Produces very long vines and very heavy foliage. Heavy producer of short, well filled pods. No better soil fertilizing plant can be found. This variety is known and recognized as the best for all purposes. Plant 1 peck to 1 acre in rows 4 to 5 feet apart. 60 lbs. per bushel.

Prices: 1 lb. 25c; 2 lbs. 45c, postpaid.

353. MAMMOTH YELLOW (Soy). Vines bushy, vigorous, erect habit. Sow broadcast a half bushel to one acre or 1½ feet apart in rows 3½ feet apart. An excellent and popular variety. 60 lbs per bushel.

Prices: 1b. 25c; 2 lbs. 45c, postpaid.

354. LAREDO (Soy). Good soil builder, and very favorable. Planted from the earliest cotton planting date to the first of July with reasonable certainty of a good crop. Seeds very small and one bushel will plant from 8 to 10 acres in 2½ ft. rows, covered lightly. 60 lbs. per bushel.

Prices: 1b. 35c; 2 lbs. 60c, postpaid.

355. OTOOTAN (Soy). A very fast growing plant, growing 4 to 5 feet high, fine stems and delicate leaves. Cures quickly, makes hay of finest texture and very fine quality. It leads the field for silage or forage. Jet black, rather small, a half peck plants an acre, 2½ to 3 feet between the rows. Extensively used throughout the south. 60 lbs. to the bushel.

Prices: 1 lb. 35c; 2 lbs. 60c, postpaid.

STECKLER'S JAPANESE BUCKWHEAT

356. STECKLER'S JAPANESE BUCKWHEAT.

Plant in the Spring or Fall, matures in 8 to 10 weeks. Sow one bushel to the acre. Grown for Poultry feed, when in bloom, excellent for honey bees, easily cultivated and generally grown. One bushel will plant one acre.

Prices: 1b. 25c; 2 lbs. 40c, postpaid.

STECKLER'S CHUFAS OR EARTH ALMONDS

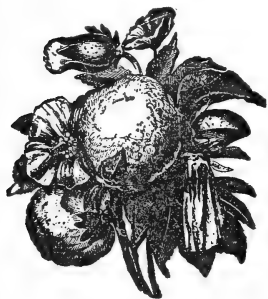

357. STECKLER'S CHUFAS OR EARTH ALMONDS.

Plant from March to June in rows 2 to 3 feet apart. Forms an abundance of small tubers on the roots. One of the best feeds for hogs and poultry, easily harvested. One peck will plant one acre.

Prices: 1b. 40c; 2 lbs. 75c, postpaid.

Soy Beans

Delfos Cotton

Steckler's Cotton Seed

Selected Varieties

Planting time, March and April. One bushel is required to plant one acre. Thoroughly break and prepare the ground early. Rows should be 3½ to 4 feet apart and hills about 12 to 14 inches apart in the row. When the cotton comes up it should be off-barred deep while it is small in order to let the heat of the sun strike the beds. As the plants get larger, shallow down and towards the last, cultivate very shallow. Always keep the top crust of the ground broken in dry weather, as it prevents it from losing its form. Never stop plowing for wet weather until the ground turns in slices; then quit immediately until it dries off. Never lay-by until the middle of August. The first week in April has been found to be the best time for planting cotton.

NOTE:—All of our Cotton Seed is free from Boll Weevil. These are all good varieties which have been thoroughly tested and recommended by Agricultural Colleges and Experiment Stations of the Southern States.

358. DELFOS 6102 (Long Staple). Dwarf plant, small leaves and square foliage. Very long limbs. Length of staple 1 1-8 to 1 3-16 inches. One of our best and most widely grown varieties. 30 lbs. per bushel.

Prices: 1 lb. 30c, postpaid. Not prepaid, (peck 7½ lbs.) 75c; bushel, (30 lbs.) \$2.25.

359. KING'S EARLY IMPROVED (Short Staple). Extra early, wonderfully prolific, small seed, lint 36 to 40%, a fine variety. 30 lbs. per bushel.

Prices: 1 lb. 30c, postpaid. Not prepaid, (peck 7½ lbs.) 75c; bushel, (30 lbs.) \$2.25.

360. WANNAMAKER-CLEVELAND BIG BOLL. A short cotton usually about an inch cotton, and probably the best of all the inch cottons. It seems to do well on both hill and bottom lands, and produces a real crop everywhere. Early maturity, big boll, medium foliage, big out-turn at the gin, 36 to 39 per cent, easy to pick, very prolific in the field.

Prices: 1 lb. 30c, postpaid. Not prepaid, (peck 7½ lbs.) 75c; bushel, (30 lbs.) \$2.25.

361. HALF AND HALF. A very short cotton about three-fourths to seven-eighths inches and for that reason much criticised by cotton men. But, it is one of the popular cottons nevertheless because it turns out at the gin heavier than any other cotton, 40 to 45 per cent, and it has shown as high as 48 per cent. Bigger out-turns from ridge land than bottom soils naturally early.

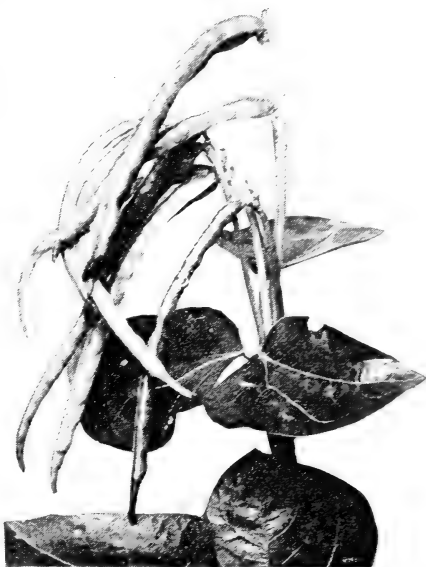

Prices: 1 lb. 30c, postpaid. Not prepaid (peck, 7½ lbs.) 75c; bushel, (30 lbs.) \$2.25.

Steckler's Cow or Field Peas

Planting Time, Southern States, March to August

- 332. BRABHAM.** Grows upright, very heavy producer, retains foliage very well while being cured. Very vigorous growing. An excellent variety, very popular. 60 lbs. per bushel. 2 bu. per acre. Prices: Pkt. 10c; lb. 25c, postpaid.
- 333. BROWN AND WHITE SUGAR CROWDER.** Very prolific producer, upright growing, bush form. This variety planted extensively for table use, very popular. 60 lbs. per bushel. 2 bushels per acre. Prices: Pkt. 10c; lb. 40c, postpaid.
- 364. CANADA FIELD.** This variety is grown extensively for pigeon feed and as a fertilizing pea. When mature the pea is perfectly round and smooth. 60 lbs. per bushel. Price: Pkt. 10c; lb. 25c, postpaid.
- 335. CLAY.** Produces heavy foliage as well as pods. Very vigorous growing. The Clay is the most popular field pea in the South. excellent forage crop. 60 lbs. per bushel. Prices: Pkt. 10c; lb. 25c, postpaid.
- 366. LADY.** Small round, pure white pea. Generally planted between corn and used extensively for the table. 60 lbs. per bushel. Prices: Pkt. 10c; lb. 40c, postpaid.
- 367. LARGE WHITE BLACK EYE.** Large vines, excellent for forage crop, used also for the Southern table. 60 lbs. per bushel. Prices: Pkt. 10c; lb. 35c, postpaid.
- 338. MIXED PEAS.** Often thousands of bushels of field peas become mixed and often farmers request a mixture of good varieties. These mixtures are becoming very popular. 60 lbs. per bushel. Prices: Pkt. 10c; lb. 25c, postpaid.
- 369. WHIPPOORWILL.** Upright, bushy growth of plant. A great favorite because of early maturity and because they are easily harvested. 60 lbs. per bushel. Prices: Pkt. 10c; lb. 25c, postpaid.
- 370. AUSTRIAN WINTER PEAS.** A new winter legume, resembles an early table or English Pea in size of seed, a heavy yielder, can be grazed and will put on a good second growth with better stooling out. Makes splendid hay, excellent for turning under, a fine winter crop and soil improver. Prices: Pkt. 10c; lb. 35c, postpaid.

Cow Peas

Steckler's Grass Seeds---Field and Lawn

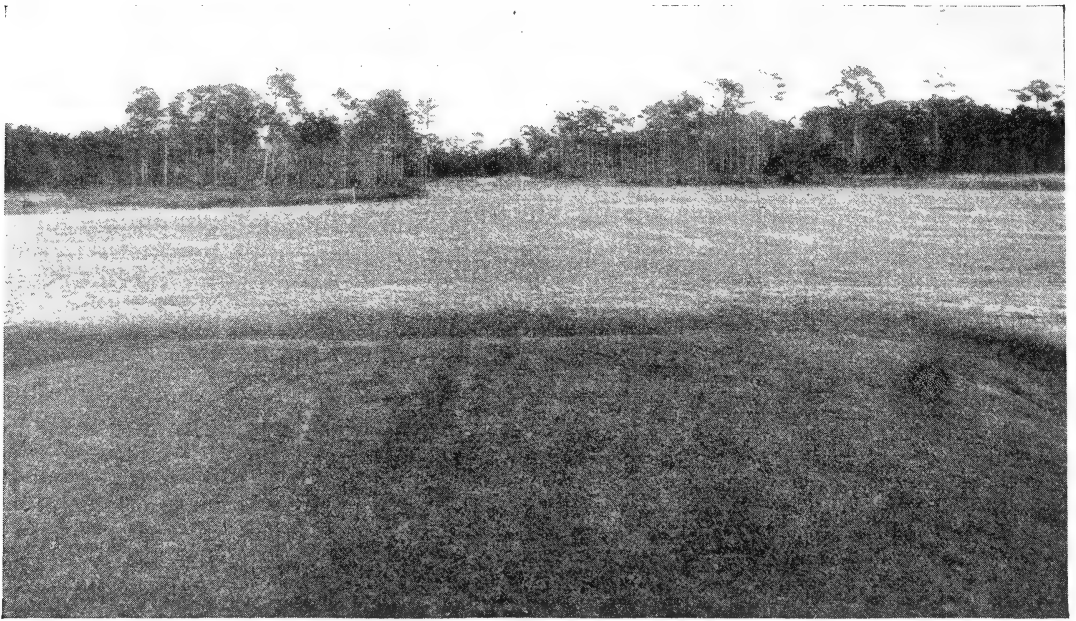

We have the finest and best assortment of Field and Lawn Grass Seeds offered in the South. These selected varieties are grown for us by the best growers in the United States. Our 100 years of experience is behind our selection of seeds and growers.

- 371. BERMUDA GRASS.** Plant from February to September, 20 pounds per acre for lawns and 30 lbs. for Golf Courses. Bermuda is used more extensively than any other grass on Southern lawns and Golf Courses. It has a narrow, thin leaf of dark green color. Spreads quite rapidly and grows very well in the South. It dies down with a heavy frost in the fall but comes up in the Spring. It does not do well in the shade but is very hardy where it has sunshine. Takes from 20 to 30 days to start. Prices: lb. 75c; 5 lbs. \$3.00, postpaid.

No. 15, Green and Fairway Bermuda Grass

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

Bermuda Tee Carpet Grass Fairway
Winter Scene—Edgewater Gulf Hotel Golf Course

372. CARPET GRASS. Plant from February to September, 20 lbs. per acre for lawn and 30 lbs. for Golf Courses. This is a much coarser grass than Bermuda but will stand drought and hot weather better and also stays green longer in the Fall. It is a natural perennial grass in Louisiana. It is used very extensively in lawns, golf courses, fairways and parks. It stands more shade than Bermuda. Takes 20 to 30 days to start. Carpet Grass is also used extensively for meadows and pastures in the South.

Prices: lb. 60c; 5 lbs. \$2.50, postpaid.

Alfalfa

373. CLOVER — Steckler's Matchless Alfalfa. This is the most widely planted of all clovers. It produces an extremely long root, stands drought exceedingly well. It will produce 4 or 5 crops of hay a year and it enriches the soil. Its very long branching roots loosen the subsoil. A very profitable field crop for the farmer. Plant January to April for Spring and September to November for Fall at the rate of about 30 pounds per acre.

Prices: lb. 45c; 5 lbs. \$2.00, postpaid.

374. CLOVER, Alsike. Sow in Spring, six lbs. to the acre. This is exceptionally good for wet lands, very similar to Red Clover, except smaller plant and leaves. Makes excellent pastures and hay. Succeeds in impoverished and acid soils. This is a Perennial Clover.

Prices: lb. 50c; 5 lbs. \$2.25, postpaid.

375. HAIRY PERUVIAN ALFALFA. Sow thirty pounds per acre, from January to April for Spring and September to November for Fall. Withstands colder weather better than Alfalfa or Lucerne and usually produces a heavier yield of hay. A perennial plant. We highly recommend this variety for hay and pasture.

Prices: lb. 45c; 5 lbs. \$2.00, postpaid.

373. LESPEDEZA or JAPAN CLOVER. One of the best clovers that can be planted in the South during the spring months. Planted at the rate of one bushel to the acre from December to May. If sown on sod the land should be first scarified with a disc harrow in order to give the seed a good seed bed. Thrives on very poor soils and continually improves them, at the same time yielding a highly profitable and nutritious forage.

Prices: lb. 55c; 5 lbs. \$2.25, postpaid.

377. RED CLOVER.

Sow in Spring or Fall, fifteen pounds to the acre. This variety is most universally grown throughout the country. On fertile soil and especially where hay is desired, it has only one superior, and that is Alfalfa.

Prices: lb. 60c; 5 lbs. \$2.50, postpaid.

Alsike Clover

378. WHITE BLOSSOM SWEET (Mellilotus Alba or Bokhara.) Sow 20 pounds per acre from February to April for Spring and September to December for Fall. Resembles Alfalfa in appearance and will grow luxuriantly on soils rich in lime and of insufficient depth for successful growing of either Alfalfa or Red Clover.

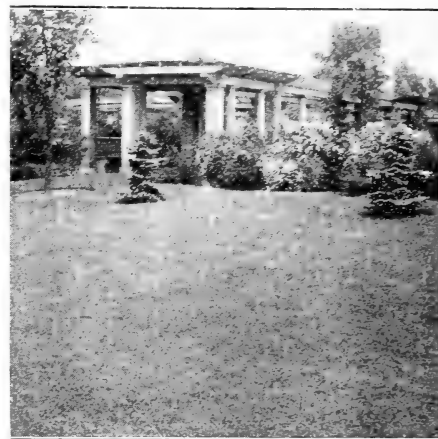

Prices: lb. 35c; 5 lbs. \$1.50, postpaid.

379. WHITE DUTCH. This is a very common variety in the South, although small for hay production, it is one of our best pasture clovers. Sow in Spring or Fall, 12 pounds per acre.

Prices: lb. 75c; 5 lbs. \$3.00, postpaid.

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

- 380. YELLOW BLOSSOM SWEET** (*Melilotus Indica*). Sometimes called Sour Clover. Grows about 10 to 15 in. high. Early producer. A popular variety among many farmers. Sow in early Spring or Fall, 20 lbs. per acre. Prices: 1 lb. 20c; 5 lbs. \$1.00, postpaid.
- 381. JOHNSON GRASS.** Perennial with cane-like roots. Tender roots are excellent for hogs. If cut while tender, stock will eat it but it permitted to get coarse and tough, stock will not eat it. Sow during March and April, 1 to 1½ bushels, per acre; exceedingly hard to eradicate when once planted. Prices: 1 lb. 40c; 5 lbs. \$1.75, postpaid.
- 382. KENTUCKY BLUE.** The standard grass in America for pastures. Growth is slower than many other varieties but when once established it is permanent. Sow 30 pounds per acre in Spring or Fall. Prices: 1 lb. 50c; 5 lbs. \$2.00, postpaid.
- 383. ORCHARD.** One of the best varieties for hay and pasture in the South. Very hardy, starts early in Spring and continues well into the winter. Bears close grazing and is very long lived. Grown very extensively in the South for pasture and hay. Sow from September to June, 45 pounds per acre. Prices: 1 lb. 50c; 5 lbs. \$2.25, postpaid.
- 384. RED TOP.** Re-cleaned. Perennial, height 1 to 2 feet. Does well on low, wet lands. This is an excellent pasture and hay grass. An excellent variety, 30 pounds per acre. Sow from October to February. Prices: 1 lb. 40c; 5 lbs. \$1.75, postpaid.
- 385. RYE, ENGLISH (Imported).** The winter lawn for Southern homes. Southern winter lawns are greatly admired and enjoyed and are produced with very little expense. The summer lawn grasses die out when frosts and cold weather come. Rye Grass is planted from September 15th to about April 1st. It comes up very quickly. English Rye is slightly lighter in color and some prefer it to the Italian. Sow 300 pounds to the acre, for lawn and golf courses and 150 pounds per acre for meadows. For a city lot 30x120, 12 lbs., or 1 lb. to 100 sq. feet. Prices: 1 lb. 35c; 5 lbs. \$1.50, postpaid.
- 386. DOMESTIC or AMERICAN RYE.** Grown in the United States from the Imported Italian and English. Used extensively today in America for Lawns, Golf Courses, Meadows and Pastures. 300 lbs. per acre for lawns and golf courses; 150 for meadows, for a city lot 30x120, 12 lbs. or 1 lb. to 100 square feet. Prices: 1 lb. 25c; 5 lbs. \$1.00, postpaid.
- 387. RYE, ITALIAN (Imported).** This variety of Rye Grass some gardeners claim is a little harder than the English. It is slightly darker and stays green a little longer in the early summer. It is planted as extensively as the English and is as well liked. 300 pounds per acre is required for lawns and golf courses, 150 pounds per acre for meadows. For a city lot 30x120, 12 lbs. or 1 lb. to 100 square feet. Prices: 1 lb. 35c; 5 lbs. \$1.50, postpaid.
- 388. STECKLER'S SUNNY SOUTH LAWN (Mixture).** Plant September to April 150 pounds per acre. Great success has been reported from the planting of this mixture. Prices: 1 lb. 50c; 5 lbs. \$2.50, postpaid.
- 389. SUDAN.** An excellent forage crop. Grows vigorously and hardy. Yields more tonnage per acre than any other forage crop. Plant 15 pounds per acre. March and April for Spring; August and September for Fall. Prices: 1 lb. 30c; 5 lbs. \$1.25, postpaid.
- 390. STECKLER'S WINTER LAWN AND GOLF LINK GRASS.** Especially adapted for all lawns in the South. An old lawn which has been planted with Bermuda or Carpet should be prepared in the following manner: The Grass should be mowed as closely as it is possible, scarified with a rake and planted with Steckler's Winter Lawn and Golf Link Grass at the rate of 300 lbs. to the acre or 12 lbs. to the average city lot of 30x120, or 1 lb. to 100 square feet, cover this with a light loam of any sort and see that it is well covered so that the seed will be in contact with the sod below and the soil on top. This should not be done any earlier than September 15th and not later than April 1st, as the Winter Lawn grass does not last after June 1st. When this dies away either the Bermuda or Carpet Grass which ever you have planted will come up unnoticed. Prices: 1 lb. 35c; 5 lbs. \$1.50, postpaid.
- 391. NATIVE ITALIAN RYE.** Grown in America from the Imported Italian Rye, having the glossy green color of the imported, extensively planted on private lawns and golf courses throughout the United States today. 300 lbs. per acre for lawns and golf courses, 150 pounds per acre for meadows. For a city lot 30x120, 12 lbs. or 1 lb. to 100 square feet. Prices: 1 lb. 25c; 5 lbs. \$1.00, postpaid.

Steckler's Winter Lawn and Golf Link Grass

Steckler's Oats

- 392. STECKLER'S LOUISIANA RED RUST PROOF OATS.** Planted from October to March, 2½ bushels per acre. This variety is very vigorous growing, heavy producing and is especially adaptable to this section. Its rust resistant feature makes it dependable for production. Prices: Not prepaid, peck 50c; bu. \$1.60; 5 bu. sack, \$7.25.
- 393. TEXAS RED RUST PROOF OATS (Re-cleaned).** This is an excellent variety, very popular throughout the South and Southwest. Produces large, heavy heads, full of excellent quality oats. Prices: Not prepaid, peck 50c; bu. \$1.50; 5 bu. sacks, \$6.25.

Steckler's Seed Rice

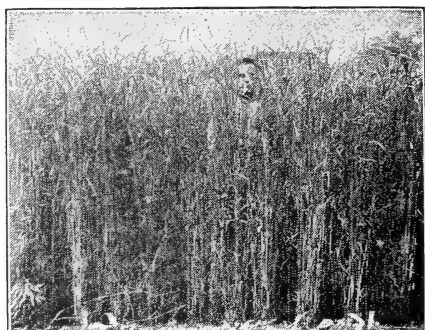

Rice can be grown on upland and as well as on flooded lands. Any ground having a reasonable amount of moisture will make fair crops of 20 to 40 bushels per acre. Plant about April, about 20 seeds in each hill in rows about 1½ foot apart.

- 394. HONDURAS.** Long, broad grain, excellent quality.
- 395. EDITH.** Long thin grain.
- 396. LADY WRIGHT.** Well known medium grain.
- 397. LOUISIANA PEARL.** Short and round and widely planted. Prices: 1 lb. 30c, postpaid. Not prepaid, peck (11 lbs.) \$1.50; bu. (44 lbs.) \$5.00.
- 398. WILD RICE.** Best time to sow in Spring, although it can be sown anytime. Thoroughly soak seed in water so that it will sink into desired situation, sow in shallow water not over three feet deep and from this depth into the shore. A still day should be chosen for sowing so that the seed will not drift out to deep water. Very attractive for wild fowl on game reserves and small lakes. Sow 20 pounds per acre. 1 lb. \$1.00; 5 lbs. \$4.50, postpaid.

Steckler's Oats

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

Southern Grown Rye

DWARF ESSEX RAPE

399. DWARF ESSEX RAPE. For spring, fall or winter planting for quick green forage or grazing for hogs and poultry, there is nothing equal. Can also be used on the table as a substitute for "turnip greens." Tops look like Rutabagas and growth is similar yet larger. Rape makes no bulbous roots. Can be planted in rows like turnips, 20 pounds per acre, or broadcasted, 8 to 10 pounds per acre.
Prices: 1 lb. 30c; 3 lbs. 75c, postpaid.

STECKLER'S FIELD RYE

400. ROSEN. This variety holds the reputation of yielding 10 to 15 bushels more per acre than other varieties. Plant $1\frac{1}{2}$ bushels per acre from September to December.

Prices: 1 lb. 25c, postpaid. Not prepaid, $\frac{1}{2}$ bu. \$1.85; bu. \$3.50.

401. SOUTHERN GROWN RYE. It stools heavy, very hardy, withstands cold weather. Grown very extensively for winter stock feeding. Sow broadcast about $1\frac{1}{2}$ bushels per acre and cover about $1\frac{1}{2}$ inches. Planted August to November.

Prices: 1 lb. 25c, postpaid. Not prepaid, $\frac{1}{2}$ bu. \$1.85; bu. \$3.50.

402. ABRUZZI RYE. Of rapid growth and planted extensively in the South, planted from September to November. $1\frac{1}{2}$ bushels per acre. Excellent for grazing and grain crop.
Prices: 1 lb. 30c, postpaid. Not prepaid, $\frac{1}{2}$ bu. \$2.00; bu. \$3.75.

Steckler's Sorghums and Millets

Especially adaptable to the South.

403. EARLY AMBER SORGHUM. Exceedingly popular for forage, relished greatly by stock, because of sweetness. Makes good syrup but not quite as good for syrup as the Orange because of the small stalk. Plant March to July in rows 3 feet $12\frac{1}{2}$ pounds per acre, 6 to 10 seeds, 12 to 18 inches apart in rows. If sown broadcast, half bushel per acre.

404. EARLY ORANGE SORGHUM. Equally as valuable as the Amber for forage but on account of the longer growth it is better for syrup making. About ten days later than the Amber. Planting and culture same as Amber.

405. FETERITA. This is 10 to 15 days earlier than Kaffir Corn, makes good fodder, and makes an excellent yield of grain without having received any rain from the day it was planted until it was harvested. 15 pounds per acre. Planted from March to May.

406. GERMAN MILLET. This is the favorite variety. Heavy producer of excellent hay. Sow April to June, 15 to 20 lbs. per acre. Cut when in bloom, recommended for this climate.

407. JAPANESE HONEY DRIP CANE. Good syrup producer, splendid forage crop and if drilled thickly makes excellent hay. Very prolific, makes about 200 gallons of highly flavored syrup per acre. For syrup sow 15 pounds per acre. We recommend this highly.

White Kaffir Corn

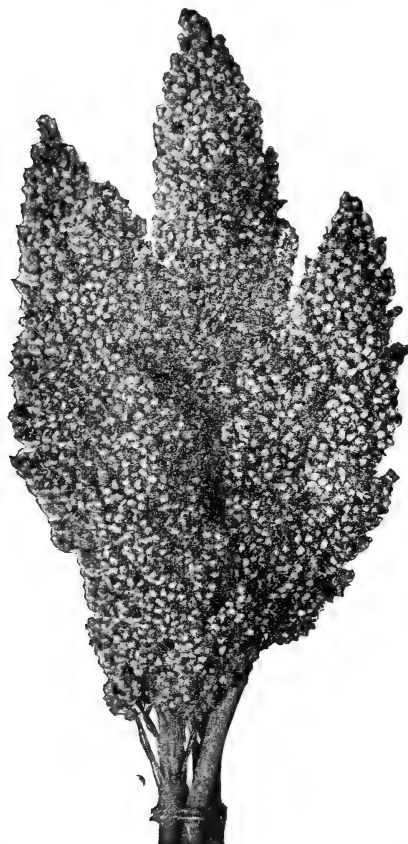

408. MILO MAIZE (Yellow). Splendid non-saccharine sorghum for feed crop. Planted in rows 4 to 5 feet apart, sow 10 lbs. per acre from March to August.

409. PEARL or CATTAIL MILLET. Especially valuable in the South; an enormous cropper. Used for green feed only.

410. WHITE KAFFIR CORN. Makes excellent fodder, keeps green and brittle. For grain, sow 10 pounds per acre in rows about 3 feet apart. For fodder, sow $\frac{1}{2}$ to 1 bushel either broadcast or in drills. Planted March to June.
Prices on above: 1 lb. 25c, postpaid. Not prepaid, 5 lb. lots, 20c lb.

411. EGYPTIAN WHEAT (Shallu). Properly belongs to the non-saccharine Sorghums, excellent food for poultry and all stock on the farm. Threshed as wheat or other grain. Planted in Spring and early Summer. Sow 20 pounds per acre from February to July.

412. EVERGREEN BROOM CORN. One acre will produce 500 lbs. of brush and nearly 40 bushels of seed which is used for feed. Plant and cultivate similar to corn. Sow March and April in rows about $3\frac{1}{2}$ feet apart, plant 6 inches apart in rows. Requires 20 pounds per acre. We recommend planting of more Broom Corn.
Prices on above: 1 lb. 30c, postpaid. Not prepaid, 5 lb. lots, 25c lb.

Feterita

WRITE US FOR PRICES ON LARGER QUANTITIES
 THAN QUOTED.

Steckler's Sunflower

413. MAMMOTH RUSSIAN. Heads often measure from 12 to 15 inches in diameter, containing an immense amount of seed, which is used for Poultry feed, planted in Spring, 3 pounds per acre.
Prices: Pkt. 10c; lb. 30c, postpaid. Not prepaid, 5 lb. lots 20c per lb.

SAGRAIN

414. SAGRAIN. A comparatively new grain and is claimed to be one of the finest of the sorghums for forage and ensilage, as it is quite sweet and grows an abundance of broad long leaves. It is a wonderful grain to stool out, makes fine heads of large, light brown grains which is excellent for stock and poultry feeding. Drill at the rate of 3 to 5 pounds per acre.
Prices: 1 lb. 25c, postpaid. Not prepaid, 5 lbs. 20c per lb.

CASTOR BEANS

415. ORDINARY CASTOR BEANS. The variety used for oil extraction. Plant in 5 ft. elevated rows, 6 feet between the row and 6 feet in the row, cultivated the same as you would any ordinary field crop. Requires about 5 pounds to plant an acre.
Prices: Pkt. 10c; 1 lb. \$1.00, postpaid.

STECKLER'S HAIRY, WINTER OR SAND VETCH

Culture—Plant from August to November or early Spring with small amount of Rye, Oats, Wheat or Barley. Sow about 40 lbs. per acre. Makes an excellent hay crop and is very popular throughout the South. A good soil improver.

416. STECKLER'S HAIRY, WINTER OR SAND VETCH.
Prices: lb. 30c, postpaid. Not prepaid, 5 lb. lots, 25c per lb.

STECKLER'S BARLEY (Southern Grown)

Culture—Grown extensively for winter and spring grazing. Plant about 2 bushels per acre, September to December.

417. Prices: lb. 25c, postpaid. Not prepaid; ½ bu. \$1.40, 48 lb. bu. \$3.00.

Steckler's Vetch

STRAWBERRY SHOOKS OR DIRT BANDS

418. STRAWBERRY SHOOKS OR DIRT BANDS.

Eggplants, Muskmelons and Early Cucumbers pay well if they come early into the market. In order to have them early, it is a good plan to start them in a cold frame in what are called "Dirt Bands." This is a box 4 inches square and 4 inches deep, without bottoms. These are placed in a frame and filled up with good rich soil, and five or six seeds in each box; when the plants come up, thin them out to one or two in each box. Before using dirt bands, wet them thoroughly before bending or they will be apt to break at the grooves, as they are made of thin veneered wood.

Price: 75c per 100; \$4.00 per 1000, not prepaid.

Tacks for Dirt Bands and Boxes, ¼ lb. 15c; lb. 50c, postpaid.

STECKLER'S PEANUTS

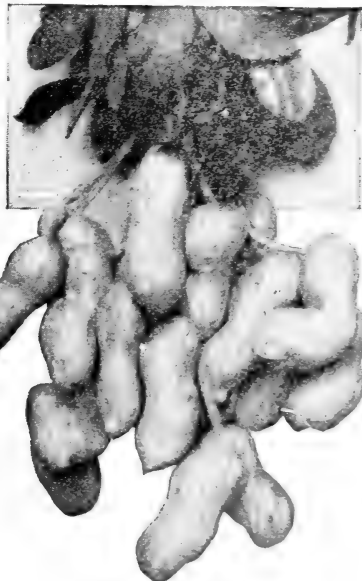

Culture—Planting time, Southern States, April to August. Plant two bushels per acre, in rows 2½ to 3 feet apart in hills about 12 to 15 inches apart in the rows. Cultivate well and keep free from weeds.

419. IMPROVED WHITE VIRGINIA. Grows upright and produces heavy crop of large peanuts. 20 lbs. per bushel.

420. WHITE SPANISH. Small pods, very prolific. The whole plant is harvested and used for stock feeding, very nutritious.

421. TENNESSEE RED. Very large shells, usually contains 3 large kernels, enormously productive.

Prices: lb. 30c, postpaid. Not prepaid, 10 lb. lots 18c per lb.

Spanish Peanuts

Steckler's Wheat

Culture—Best time to plant in South, October 15th to December 15th. Seed should be drilled in rather than broadcasted. In early planting (to November 15th), use 1 bushel per acre, later planting use more.

422. RED MAY. Many planters claim that this variety is earlier than Fultz. Beardless, excellent producer, recommended highly.

Prices: lb. 30c, postpaid. Not prepaid, peck (15 lbs.) \$1.40; bu. (60 lbs.) \$4.25.

Steckler's Flower Seeds

Put up in 10c Packages—3 for 25c; 12 for \$1.00, postpaid, except where noted.

Flower seeds require a little more care in sowing than the vegetable seed. The ground should be well pulverized and light enough not to bake after a rain. Some of the more delicate and finer varieties are better sown in boxes or seed pans, where they can be handled and protected from hard rains or cold weather, the other kinds do not transplant well, and are better sown at once where they are to remain.

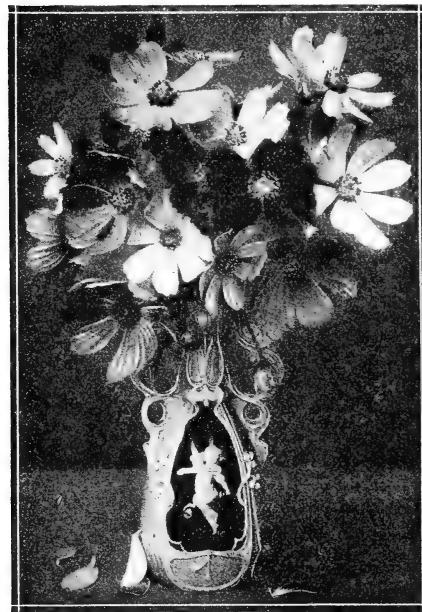

All flower seeds in packages are mailed free of postage to the purchaser. Where there is more than one color, we generally import them mixed, as we find that most of our customers do not wish to purchase six packages or more of one variety to get all colors. One package of Asters, Zinnia, Phlox, Chinese Pink, Stocks, Petunia, Portulaca and others will always contain an equal mixture of the best colors.

Asters

434. **BALSAMINA CAMELIA FLORA ALBA.** Pure white flowers, about two feet high, used for bouquets. Sow all Balsaminas from February till August.

435. **BELLIS PERENNIS.** Daisy. Finest double/ mixed variety; four inches high. October till January.

Cosmos

423. **ALTHEA Rosea**—Hollyhock. October till April. Very hardy; 4 to 6 feet high.

424. **ALYSSUM.** Little Gem, Sweet Alyssum. Free flowering; six inches high; white flowers; very fragrant. October till April.

425. **ANTIRRHINUM Majus.** Snapdragon. Choice mixed. Showy plant of various colors. About two feet high. Sow from October till March.

426. **AMARANTHUS TRICOLOR.** Joseph's Coat. Very showy; cultivated on account of its leaves, which are green, yellow and red. Two to three feet high. October to April.

427. **AGERATUM (Mexican Mixed).** A hardy annual of easy culture, especially valuable for bedding, as it is literally covered with blossoms all summer. Sow the seed early in the Spring, either in boxes to transplant, or out of doors, and thin to four to six inches.

428. **AMARANTHUS Caudatus.** Love Lies Bleeding. Long racemes with blood red flowers. Very graceful; three feet high. October to April.

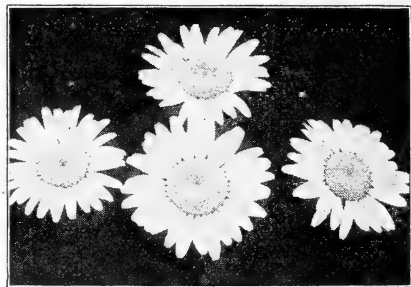

429. **AQUILEGIA.** Columbine. A showy and beautiful flower of different colors; two feet high. Sow from October till March.

430. **ASTER.** Semple's Branching. Beautiful for cut flowers. The flowers are large double, with graceful wavy petals borne on long stiff stems, and the colors are clear and handsome. Excellent for cutting; two feet. December till March.

431. **ASTER.** Trufant's Paeony Flowered Perfection. Large double paeony-shaped flowers of fine mixed colors, one of the best varieties. Two feet high; sow from December till March.

432. **ASTER.** Queen Margaret, German Quilled. Perfect double quilled flower, of all shades. One and a half feet high. December till March.

433. **BALSAMINA.** Mixed. Improved Camelia-flowered, very double and beautiful colors. February to August.

Shasta Daisies

436. **SHASTA DAISY.** Burbank's New Double Fringed. This new one is an absolute perpetual bloomer throughout the whole year wherever it has a chance. Oct till April.

437. **CANNA INDICA.** Indian Shot. Handsome foliage plants with large spikes of bright crimson, scarlet, bright yellow orange and spotted flowers. Sow in boxes or flower pots from November to March.

438. **CELOSIA CRISTATA.** Dwarf Cockscomb. Very ornamental producing large head of crimson and yellow flowers one to two feet high. February till August.

439. **CENTAUREA CYANUS.** Cornflower. Bottle Pink. A hardy annual of easy culture; of various colors; two feet high. March and April.

440. **CHRYSANTHEMUM TRICOLOR.** (Carinatum). Summer Chrysanthemum. Showy Summer bloomers of different colors, 12 to 15 inches high. March to April.

441. **COLEUS.** A well known and beautiful bedding plant which can be easily propagated by seeds which produce different shades of colored plants. March and April.

442. **COSMOS BIPINNATA HYBRIDA.** White, yellow and mixed. A very showy annual similar in shape to the Bright-Eye Daisy or Coreopsis, but taller and more brilliant in color. Dec, till April.

443. **COREOPSIS.** (Calliopsis), Bright Eye Daisy. Handsome free blooming plants of the easiest culture, two or three feet high, with yellow and brown daisy-like flowers. Dec. to March.

444. DIANTHUS CARYOPHYLLUS. Carnation Pink. They are double, of different colors, and very fragrant; can be sown either in Fall or Spring; should be shaded during mid-summer and protected from hard rains; three to four feet high. November till April.

445. DIANTHUS CARYOPHYLLUS MARGARITAE ROBUSTUS. fl. pl. Semi High Double Margaret Carnation. Dwarfish habit, grows from 12 to 15 inches high. The flowers are much variegated, occasionally producing yellow ones. October to April.

446. DIANTHUS BARBATUS. Sweet William. Their beautiful colors make them very showy. Should be sown early, otherwise they will not flower the first Spring; one and a half feet high. October till April.

447. DIANTHUS CHINENSIS. Chinese Pink. A beautiful class of annuals of various colors which flower very profusely in early Spring and Summer; one foot high. October till April.

448. DIANTHUS HEDDEWIGGII. Japan Pink. This is the most showy of any of the annual pinks. The flowers are very large and of brilliant colors; one foot high. October, till April.

449. DELPHINIUM CHINENSIS. Dwarf China Larkspur. Mixed colors very pretty, one foot high. All Larkspurs should be sown from November till April.

450. DELPHINIUM IMPERIALIS. fl. pl. Imperial Flowering Larkspurs. Very handsome variety of symmetrical form. Mixed colors: bright red, dark blue and red striped; 1½ feet high. November to April.

Dianthus

451. DELPHINIUM AJACIS. Rocket Larkspur. Mixed colors; very showy; two and a half feet.

NOTE: None of the Delphiniums or Larkspurs transplant well and are better sown at once where they are intended to remain.

452. DAHLIA. Large flowering Dahlia. Seed sown in the Spring will flower by June. Very pretty colors are obtained from seed, the semi-double or single can be pulled up as they bloom; but those seeds which are saved from the double varieties will produce a good percentage of double flowers. February till June.

Delphinium, Annual Larkspur

Eschscholtzia or California Poppy

453. ESCHSCHOLTZIA CALIFORNICA. California Poppy. A very free flowering plant, good for masses. Does not transplant well. One foot high. December till April.

454. GOMPHRENA ALBA AND PURPUREA. White and Crimson Bachelor Button or Globe Amaranth. Well known variety of flowers; very early and free flowering; continue to flower for a long time. Two feet high. From February to August.

455. GERANIUM ZONALE. Zonale Geranium. Mixed. Seed saved from large flowering varieties of different colors; should be sown in seed pans, and when large enough transplanted into pots when they can be left or transplanted in Spring into the open ground.

456. GOLDEN GLOW. (Rudbeckia). Grows 8 feet high, branching freely and bearing by the hundreds, on long, graceful stems; exquisite double flowers of the brightest golden color and as large as a Cactus Dahlia. As cut flowers the blooms last well. Perfectly hardy and blooms continuously throughout the Summer months. Per packet, 25c.

457. HELIANTHUS. fl. pl. Double Flowering Sunflower. A well known plant, with showy yellow flowers, the double is often cultivated in flower gardens. The single varieties are cultivated mostly for the seed. Four feet high. February till May.

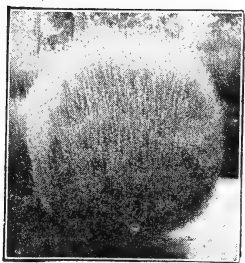

458. HELIOTROPUM. Heliotrope. Mixed varieties with dark and light shaded flowers. Should be sown in hot bed if sown early. October till April.

Golden Glow

Steckler's Flower Seeds—Continued

Mexican Burning Bush

- 464. MATHIOLA Annua.** Ten Weeks Stocks. Large flowers of all colors, from white to dark blue or crimson. Should be sown in pots or pans, and when large enough transplant into rich soil. One and a quarter feet. October till March.
- 465. MIRABILIS Jalapa.** Four O'Clock or Marvel of Peru. Flowers of various colors. Three feet. February till June.

Nasturtiums

- 470. PERENNIAL PHLOX.** Mixed. For a permanent flower bed few plants are more desirable, as they are perfectly hardy, and will flourish in any soil. The flowers range from pure white to crimson or rose, while others are striped and mottled or blotched. They blossom late in the season and bear immense trusses, often five or six inches in diameter. December till April. Pkt. 25c.

- 471. PORTULACA.** Single (Mixed). The flowers are of various colors, from white to bright scarlet and crimson. The plant is good for edging vases or pots. Half foot high. February till August.

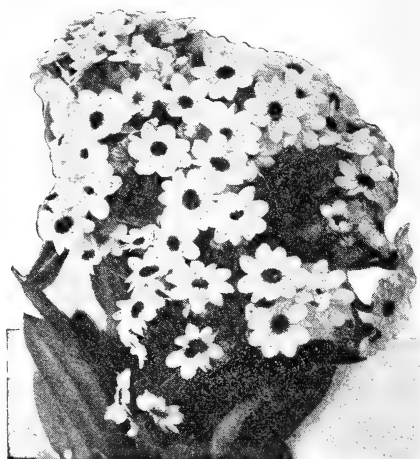

- 472. PORTULACA Grandiflora, fl. pl.** Double Portulaca. The same variety of colors with semi-double and double flowers half foot high. February till August. Mixed.

Phlox

- 459. IBERIS Amara.** White Candytuft. Can be sown at different times to have a succession of flowers. One foot high.
- 460. UMBELATA ROSA.** Purple Candytuft. One foot. October till April.
- 461. KOCHIA.** Mexican Burning Bush. A splendid and novel plant. An easily grown annual plant suitable for all parts of the South. Sown thinly in Spring when leaves begin to appear on the trees, it soon forms a cypress-like hedge of symmetrical form and of lively green color; by mid-summer it attains a height of about 3 feet and on approach of cool weather the whole plant becomes a deep red.
- 462. LANTANA.** (Hybrida Mixed). Growing from 2 to 3 feet high bearing Verbena-like clusters of flowers, in orange, white, rose and other colors. Excellent for bedding. February to August.

- 463. LOBELIA Erinum.** Lobelia. A very graceful plant with white and blue flowers. Half foot. October till March.

Myosotis, Forget-Me-Nots

- 466. MYOSOTIS Palustris.** Forget-Me-Not. A fine little plant, with small, blue star-like flowers. Half foot high. December till March.

- 467. NASTURTIUM.** Tropaeolum Majus. Tall and Dwarf Mixed. Blossoms red, yellow and salmon, used with leaves as salad. Seed-pods while young and succulent picked and used as capers. Tall variety runs, and makes an excellent screen for unsightly places. February to April, and November and December. Pkt. 10c; oz. 15c; ¼ lb. 50c; lb. \$1.50.

- 468. PHLOX Drummondii Grandiflora Alba.** Pure white, some with purple or violet eyes. December till April.

- 469. PHLOX Drummondii.** Mixed. Their various colors and length of flowering, with easy culture, make them a favorite with every one. One foot high. December till April.

Shirley Poppies

- 473. PAPAVER Ranunculus Flowered Poppy.** Double fringed flowers, very showy. Cannot be transplanted. Two feet high. October till March.

- 474. SOMNIFERUM, or Carnation Poppy.** Double flowering poppy. Different colors; very showy. October till March.

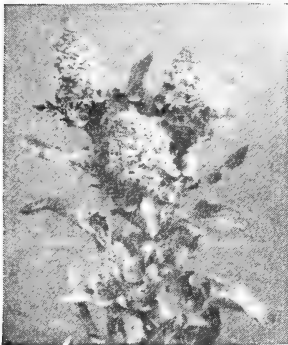

- 475. SHIRLEY POPPIES.** Single Mixed. A very beautiful selection of Ranunculus-flowered Poppy. The range of colors extending from pure white through the most delicate shades of pale pink, rose and carmine to crimson, while edged, shaded and striped. Semi-double. October till March.

WRITE US FOR PRICES ON LARGER QUANTITIES THAN QUOTED

519. **LATHYRUS LATIFOLIUS.** A non-fragrant but profuse blooming flower that deserves a place of honor in the garden. These flowers grow in large clusters on long rigid stems. A matchless cut flower of the perennial sweet pea variety. Price—25c per paper; \$1.00 per oz.

Sweet Peas

Steckler's Flower Seeds—Continued

- 520. BROWALLIA ELATA.** Mixed. A very profuse blooming annual producing blue and white flowers. Planted in August.
- 521. THE CHINESE WOOLFLOWER** (*Celosia Childissi.*)—Produces scores of branches bearing ball-shaped flowerheads of crimson color resembling a ball of wool. Planted February to August.
- 522. FOXGLOVE** (*Digitalis*). Old fashioned border plant. Produces very showy thimble-like or bell-shaped flowers, in mixed colors. Does well in cool, shady locations. Planted after danger of frost is over, about March.

Calendula

523. CALENDULA. The Ball. It has fine stems, immense double flowers of brilliant glisteny orange. A great favorite. Planted October to March. Grow 1½ ft. high.

24. CALENDULA. Orange King. Outer petals are slightly imbricated, while those of the center are curved like those of a peony. Color glowing orange. Planted October to March, grows 1¼ ft. high.

25. CALENDULA "Sensation." Vigorous growth, flowers borne on stout stems, blooms are flat, brilliant orange with a scarlet sheen and full yellow center. Planted October to March. Price: Pkt. 25c.

Hibiscus

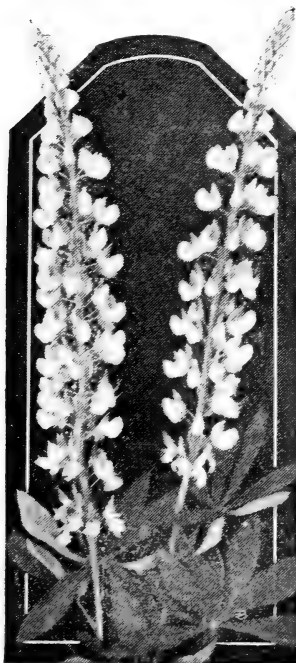

528. HIBISCUS—Finest Mixed. Shrub like plants growing from four to six feet, bearing bright colored flowers. Planted February to April.

529. LUPINS. Mixed. Free flowering, easily grown annual, with long graceful spikes of rich and various colored pea shaped flowers, valuable for mixed borders, beds and for cutting; prefers a little shade. Planted from November to April, grows 1½ feet high.

530. LUPINS. White. Same as above but pure white flowers.

531. LUPINS. Blue. Same as above but blue flowers.

532. NEMOPHILA (*Baby Eyes*). *Insignis*, Blue. Hardy annual, easy culture, very effective for border. Thrives best in particularly shaded locations. Flowers bright colors. Planted in the Spring.

Lupine

533. PETUNIA. Rosy Morn. A very pleasing clear pink with a broad white throat. A splendid sort for porch boxes, pots and beds. Planted October to April, grows 1 foot.

534. PANSY Roggli's Gt. Mixed. A very early variety of finest and rarest flowers and coloring. Very large blooms and is planted from October to March, grows about 8 inches high. Pkt. 50c.

35. RICINUS ZANZIBARIENSIS. (Mixed). Castor Bean. A distinct class which surpasses in size and beauty all other varieties. Plants attain great dimensions. Planted from March to July.

36. SCABIOSA (*Mourning Bride*). Commonly known as the Pincushion Plants. Produces beautiful flowers in delicate shades on long stems. Make very effective borders or beds. Planted after danger of frost is over about March.

37. SALVIA PATENS. Blue Salvia, very fine variety, grows 2 feet. Planted February to April. A very fine bedding plant for borders, etc. Pkt. 15c.

535. WALLFLOWER (*Goldlack*) *Finest Mixed.* A deliciously fragrant, half hardy perennial, which is adapted both to pot culture and out-door planting, produces very beautiful flowers and is oriental in effect. Planted in April.

Foxglove or
Digitalis

526. GYPSOPHILA. White. Pure White. of easy growth, several sowings should be made during the season to keep up the supply. Planted July to August and grows about 2 feet high.

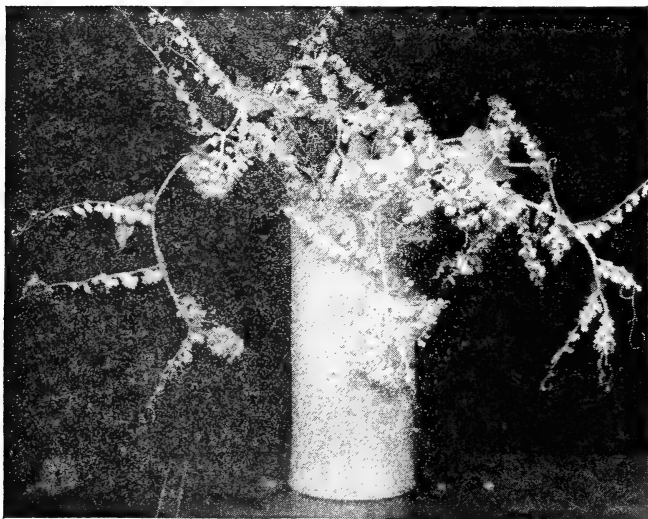

527. GYPSOPHILA. Pink. A very soft pink. Planted July to August and grows about two feet high.

Scabiosa

Steckler's Vine Seed

These Seeds are all put up in 10c Packages, except where noted.

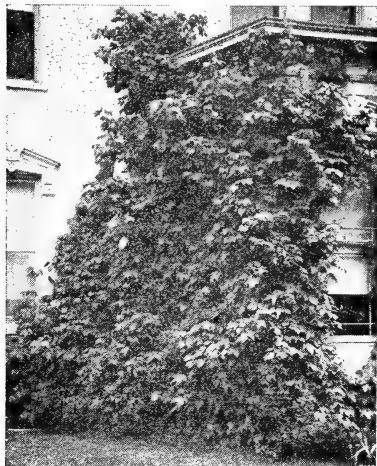

Rosa Montana or Antigonon Leptopus Vine

545. IPOMOEA NOCTIFLORA. Large Flowering Evening Glory. (The White Moonflower). A vine of rapid growth with beautiful white flowers which open in the evening. Twenty feet high. February till June.

546. IPOMOEA QUAMOCLIT ROSEA. Red Cypress Vine. Very beautiful, delicate foliage of rapid growth with scarlet star-shaped flowers. February to June.

547. IPOMOEA QUAMOCLIT ALBA. White Cypress Vine. The same as the Red variety. February to June.

548. IPOMOEA Bona-nox. The Blue Moonflower. This distinct and charming novelty is valuable on account of being in beautiful and striking contrast with the true White Moonflower.

Kudzu Vine

are used as a dressing for cuts, bruises, etc. February till July.

552. MINA LOBATA. A luxurious climber, with tube-shaped flowers. Buds at first bright red, but changing through orange yellow to a creamy white when fully expanded. Planted from February to July.

553. GIANT IMPERIAL JAPANESE MORNING GLORY. (Mixed). The vines are of robust growth, attaining a height of from 30 to 40 feet. The foliage varies greatly, some plants having yellow or silver foliage, while others are blotched and mottled. February till July.

554. SCARLET RUNNER BEANS. A rapid growing annual climber, bearing sprays of brilliant scarlet pea-shaped blossoms. Used either as a snap or shell bean for eating as well as being desirable for ornamental purposes. Seed may be planted out of doors as soon as danger of frost is past. Vines ten to twelve feet high. Oz. 15c.

539. ANTIGONON LEPTOPUS. Rosa Montana, Mountain Vine. One of the finest perennial climbers of rapid growth with long racemes of beautiful deep pink flowers. Sow in February or March in flower pots, and transplant into the open ground in May. Will flower freely the first year.

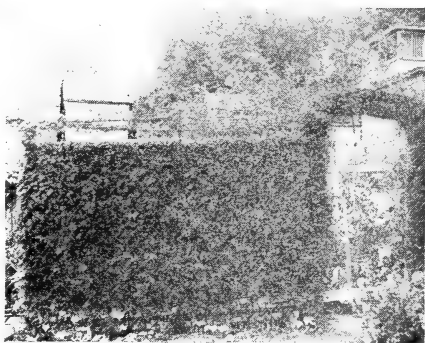

540. BALLOON VINE (Love in a Puff). A rapid and graceful climber, flowers small, white. Planted in the spring.

541. CANARY BIRD VINE. A dainty vine with beautiful cut leaves. Produces delicate flowers of clear canary yellow. Flowers resemble a bird with expanded wings. Does well in the shade. Planted early in the spring.

542. CARDINAL CLIMBER. Very attractive, strong and rapid grower. Produces fiery cardinal red flowers from mid-summer to frost. Does well in warm, sunny locations and good, rich soil. Planted about May.

543. CONVULVULUS MAJOR. Morning Glory. (Mixed). A well known vine with various handsomely colored flowers of easy culture. Grows almost anywhere. Ten feet high. February till July.

544. DOLICHOS LABLAB. (Mixed). Hyacinth Beans Free growing plant, with purple and white flowers. March till April.

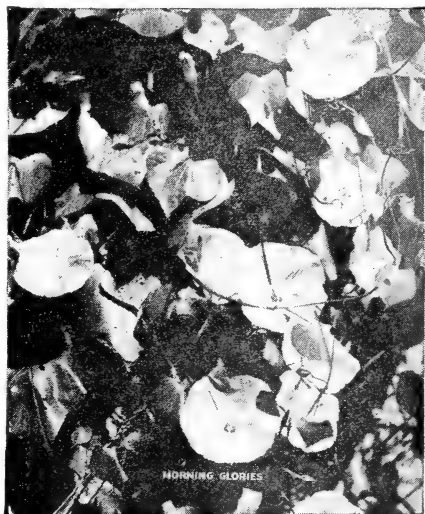

Cypress Vine

549. KUDZU VINE. A leguminous vine somewhat resembling the Velvet Bean in appearance. It is perennial and comes from the root each spring and makes as much growth by about the first of May as the Velvet Bean makes in an entire season, and that on ordinary soil, without fertilizer of any kind. When once established, Kudzu thrives as well on the poorest sandy upland as on the best lands. It gathers nitrogen from the air and consequently is a soil improver. Kudzu may be cut from two to four times during the season or pastured.

550. JAPANESE HOP VINE. Hardy Annual Climber, foliage luxuriant. One of the best plants for covering verandas, trellises, etc. Planted from May to August.

551. MOMORDICA BALSAMINA. Balsam Apple A climbing plant of very rapid growth, producing cucumber-like fruits with warts on them. They are believed to contain medicinal virtues. They are put in jars with alcohol and

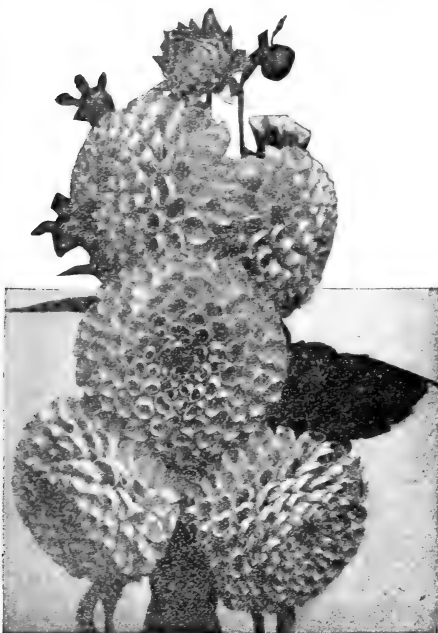

Steckler's Vine Seeds—Continued

555. THUNBERGIA (Black Eyed Susan). Lovely trailing plant with large showy flowers. Very pretty flowers in buff, white, orange, etc., with dark eyes. Mixed colors. Planted during January and February.

556. WISTERIA. Blue and White. This is one of the most popular of our hardy vines, growing rapidly; in bloom is truly magnificent, bearing long pendulous clusters of blue flowers; growing to a height of 50 feet or more. February to May.

ALL PRICES IN THIS CATALOG ARE SUBJECT
TO MARKET FLUCTUATIONS.

Steckler's Flowering Bulbs

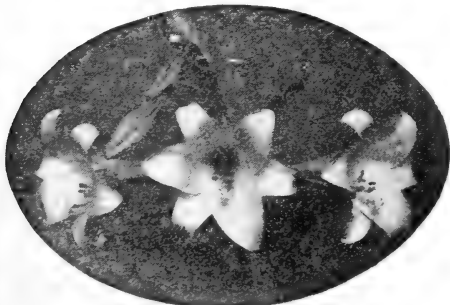

Dahlias

560. CALADIUM. Elephant's Ear. Price, 25c each; \$2.50 per dozen.

561. EASTER LILY. This handsome white Lily is similar in shape to our St. Joseph Lily, except that the tube is a little shorter and the outside petals a little more recurved.

35c each; \$3.00 per dozen, postpaid. September till March.

Easter Lilies

557. AMARYLLIS JOHNSONI. (St. Joseph Lily). Deep crimson with broad white stripe on each petal, a popular flower in the South.

Prices: 40c each; \$4.00 per doz., postpaid.

558. DAHLIAS. Fine double varieties. Plants so well known for their brilliancy, diversity of colors and profuse flowering qualities that they require no recommendation. Can be had in the following colors: White, Yellow, Red, Pink. They can be planted from February till May.

Prices: 30c each; \$2.50 per doz., postpaid.

559. FANCY LEAVED CALADIUM (Mixed). Grown for their ornamental leaves, which come in the most glorious shades and combinations. They should preferably be planted in a half-shady place and watered liberally. For massed beds or borders under large trees or for planting in shady porch boxes among green foliage plants. Price: per bulb, 25c; each \$2.50 per doz., postpaid.

Fancy Leaf Caladium

562. CALLA AETHIOPICA. Lily of the Nile. As a Winter blooming bulbous rooted pot plant there is hardly anything to come up to the beautiful Calla Lily. Bulbs should be potted in the months of October, November, December and January. and may be had to bloom from Christmas to March. 25c each; per dozen, \$2.50, postpaid.

563. CALLA. Elliottiana. A winter blooming bulbous rooted pot plant, of the same characteristics as the White, but having beautiful yellow blooms. Planted in October, November, December and January and may be had to bloom from Christmas to March. Price, 40c each; \$4.00 per dozen, postpaid.

564. CALLA. Godfrey. Smaller bulb than the common white Calla, but produces whiter blooms and is a free bloomer, very much admired and extensively planted during October, November, December and January. Price: 35c each; \$3.00 per doz., postpaid.

Gladioli Bulbs

Chicago White

567. CHICAGO WHITE. Pure white, extra long spikes, very fine for cut flowers, has lavender markings in throat. Planted March to June. Prices: 15c each; \$1.00 per doz., postpaid.

568. ANNA EBERNS. Profuse bloomers of beautiful purple flowers, growing in popularity. Planted March to June. Prices: 8c each; 85c per dozen, postpaid.

Standard Mixed Gladioli

565. AMERICA. Soft lavender pink. The most popular Gladiolus in the world. A vigorous grower and profuse bloomer; about 16 large flowers on each spike; orchid-like and charming. Prices: 6c each; 55c per doz., postpaid.

566. MRS. FRANCIS KING. Light scarlet. Extra long spikes with 20 immense flowers. Color is flame-pink shading to rich cherry-red in throat, maroon lines at petal tips and purple patch on bend of inside petals. Extremely beautiful. Prices: 7c each; 75c per doz., postpaid.

Mrs. Francis King

569. SCHWABEN. A very wonderful and attractive Canary Yellow Gladioli, very showy and immense spikes of flowers. Planted March to June. Prices: 8c each; 85c per dozen, postpaid.

570. ALICE TIPLADY. Orange Saffron flowers, grown extensively. Planted March to June. Prices: 8c each; 85c per doz., postpaid.

571. STANDARD MIXTURE. A very fine mixture of all colors, and attractive in a garden. Planted March to June. Prices: 7c each; 75c per doz., postpaid.

Cannas

572. MRS. ALFRED F. CONRAD. Finest salmon pink variety. This is the canna that flowers most abundantly here in the South. Dwarf and the flower heads droop over the fine green foliage.

Prices: 25c each; \$2.50 per dozen, postpaid.

573. HUNGARY. The ideal pink bedder, flowers large in good trusses; color not unlike that of the Paul Neyron rose; one of the best of the new introductions, 3 to 3½ feet.

Prices: 23c each; \$2.00 per dozen, postpaid.

574. KING HUMBERT. In this grand new Italian Canna we have a combination of the highest type of flowers with the finest bronze foliage. Its flowers, which, under ordinary cultivation, will measure six inches in diameter, and which are produced in heavy trusses of gigantic size, are of a brilliant orange-scarlet with bright red markings; while the foliage is broad and massive and of a rich coppery bronze with brownish green markings, bold and effective; 5 feet.

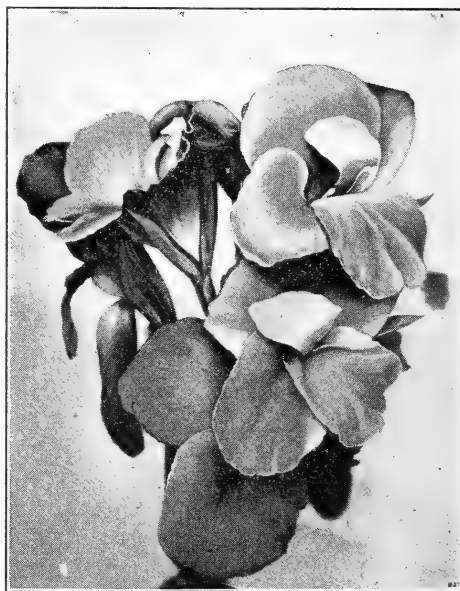

Prices: 15c each; \$1.50 per dozen, postpaid.

575. Mme. CROZY. Scarlet bordered with golden yellow. Height, 2½ feet. One of the most popular varieties.

Prices: 20c each; \$2.00 per dozen, postpaid.

576. PRESIDENT MCKINLEY. Color, fiery crimson-scarlet. An early, constant and profuse bloomer. Dwarf habit, stools freely, making a valuable bedder; height 2½ feet.

Prices: 20c each; \$2.00 per dozen, postpaid.

Plant Department

We are prepared to ship into Mississippi, Texas, Alabama, Tennessee, Arkansas and Florida, everything with exception of Citrus Fruits. In Louisiana we can ship everything we catalogue. Cannot ship plants of any kind into California and Georgia.

We strongly advise shipping by express whenever practicable. When postage is not included, we will ship by express at purchaser's expense. We are not responsible for plants arriving in bad condition, due to delay in transportation. Claim should be made to transportation company at time of receipt if plants are received in bad condition.

Ornamental Shrubs—Deciduous

577. ABELIA GRANDIFLORA. Pinkish white flowers. Dark, glossy leaves. Prices: 12 to 15 inches, \$1.00; 18 to 20 inches, \$1.50, postpaid.

578. ALTHEAS. Double White. A good summer flowering plant. Prices: \$1.00 and \$1.50 each, according to size. Not prepaid.

579. ALTHEA. Double rose. A very delicate rose. Price: \$1.00, not prepaid.

580. ALTHEA. Double Purple. Purple flowering. Price: \$1.00 and \$1.50 each. Not prepaid.

581. ALTHEA. Rose of Sharon. Sometimes called Confederate Rose, the most popular of all Altheas. First blooms snow white, changing to pink and finally turning red, the only flower of its kind that changes three times in colors. It should have a place in every garden. Prices: 24 to 30 inches, \$1.25 each, postpaid.

Althea

BUTTERFLY
BUSH.

582. BUDDLEIA. Davidii Magnifica (Butterfly Bush) or (Summer Lilac). Flowers of a deep shade of violet; plant is tall growing, blooms from June until frost, very ornamental. Prices: 6 to 8 inches, 50c; 1 to 2 feet, \$1.00 each, postpaid.

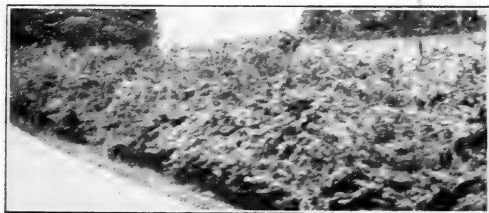

583. CAMELLIA JAPONICA. To get the best results Camellias should be planted in a partially shaded situation, especially where protected from the cold winds of the winter and the hot, afternoon sun of summer. Any good garden soil is suitable. Should have plenty of root drainage. Single and Double, Red, Pink and White. Prices: 6 inch to 8 inch, \$1.00; 10 to 12 inch, \$2.00. Large Plants, 20 inches, \$4.00 each, not prepaid.

Hedge Plants and Flowering Plants

584. CALYCANTHUS. Sweet Shrub. Flowers chocolate color and deliciously fragrant, very desirable. Price: 24 to 36 inches, \$1.25, postpaid.

585. CREPE MYRTLE. (Lagerstræmia Indica). Universal favorite in the South, and deservedly so. Deciduous shrubs, hardy in the Southern States and producing throughout the summer, great clusters of delicate fringed flowers. To obtain best results, transplanting should be done in March and April. White—This is quite a scarce and a very lovely variety. Pink—Same as scarlet in color. Prices: 5 to 6 feet, \$2.50 each, not prepaid.

586. CREPE MYRTLE. Dwarf lavender blooming, a new variety and growing in popularity right along. Price: 12 to 20 inches, \$3.00 each, postpaid.

Barberry Thunbergi

Calycanthus

Hedge Plants and Flowering Plants

Privet Hedge

588. LIGUSTRUM AMURENSE. Amoor River Privet. Most universally planted hedge. Our hedges of this desirable evergreen have for years past been noted for their perfect shade and appearance. Prices: 2 to 3 feet, \$2.25 per dozen; \$15.00 per 100, not prepaid. 4 to 5 feet, \$3.50 per dozen; \$25.00 per 100, not prepaid.

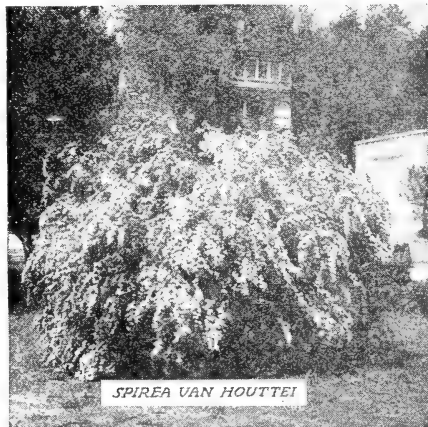

589. MAGNOLIA FUSCATA. Banana or Sweet Shrub. Very sweet scented, creamy yellow flowers, hardy in the South, blooming season, early Spring. Prices: 12 to 20 inches, \$2.00 each; 20 to 30 inches, \$3.00 each, not prepaid.

590. SWEET OLIVE. Olea Fragrance. One of the most desirable flowering shrubs for Southern gardens. White flowers although small, are produced in clusters and emit the most pleasing fragrance. Of very easy culture. Prices: \$1.00 and \$1.50 each, according to size.

591. SPIREA VAN HOUTTEI or BRIDAL WREATH. Spring blooming shrub, very attractive. Prices: 12 in. 75c; 18 in. \$1.25, postpaid. Not prepaid, 24 to 35 inches, \$3.50 each.

592. SPIREA. Anthony Waterer. A dwarf variety; color bright crimson when in bloom the entire summer and fall. Prices: 12 to 18 inches, \$1.00, postpaid.

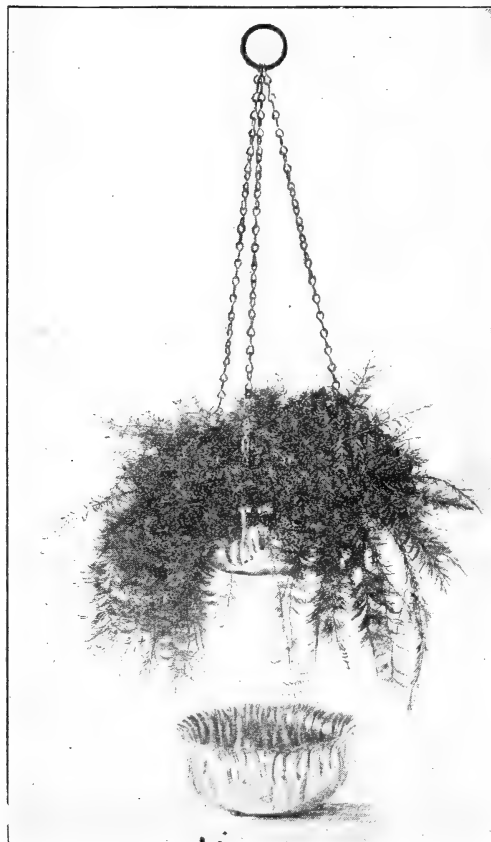

587. JAPANESE BARBERRY (Thunbergii). Popular for mixing in the shrubbery border as single specimens or for planting in clumps on the lawn. The foliage is of a rich, lustrous, bronzy red, becoming more brilliant and gorgeous throughout the summer and in the fall changes to vivid orange, scarlet and red shades. New. Prices: 12 to 18 inches, \$1.25 each, postpaid.

Ferns

593. ADIANTUM (Maiden Hair). Has fine leaves, very attractive, used for bouquets. Prices: 4 inches, 60c; 5 inches, 75c; 6 inches, \$1.25 each, postpaid.

594. ASPARAGUS SPRENGERII. A beautiful variety of this graceful class of plants, especially useful to grow as a pot plant for house decoration, or planting in hanging baskets, where it makes a graceful drooping plant with branches or fronds 4 to 5 feet in length of a rich shade of green. Prices: From 2½ inch pots 25c; 4 inch pots 50c, and 5 inch pots 75c each, postpaid.

Asparagus Sprengerii

Asparagus Plumosus

595. ASPARAGUS PLUMOSUS (Climbing) and Nanus (Dwarf). An excellent plant for window culture, of lace like texture. Very desirable for gracing bouquets. Prices from 2½ inch pots 25c; 4 inch pots 50c; and 5 inch pots 75c each, postpaid.

596. CRYPTOMINUM FALCATUM (Holly Fern). Strong, robust, easy to manage and will stand cold weather well. Prices: From 2½ inch pots 25c; 4 inch pots 50c; 5 inch pots 75c, postpaid.

597. BOSTON FERN. This popular fern is one of the best decorative plants in the fern family. Excellent for making large specimen plants and for hanging baskets. Very hardy. Prices: From 2½ inch pots 25c; 4 inch pots 50c; 5 inch pots 75c; 6 inch pots \$1.25 each, and 7 inch pots \$2.00 each, postpaid.

598. ELEGANTISSIMA (Philadelphia Lace Fern). A beautiful and rapidly growing fern that succeeds, exceedingly attractive and graceful drooping habit.

599. ROOSEVELT. Similar in appearance to the Boston, but fronds are very much thicker, giving the Roosevelt a pronounced wavy effect.

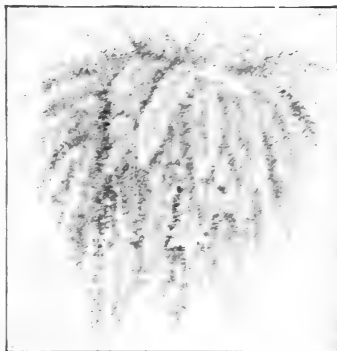

600. WHITMANII (Ostrich Plume). Very decorative fronds, has appearance of the tail of a fish, very beautiful for a house plant in the winter and a good grower.

601. COMPACT SWORD FERN. Fitting companion for the Boston, dwarfier, more erect in growth, much darker shade of green, very gracefully arched and very desirable.

602. SMITHII (Baby's Breath). This fern is splendid to use for dish planting, the finest foliage of all the ferns. Fronds very fluffy and a well known variety.

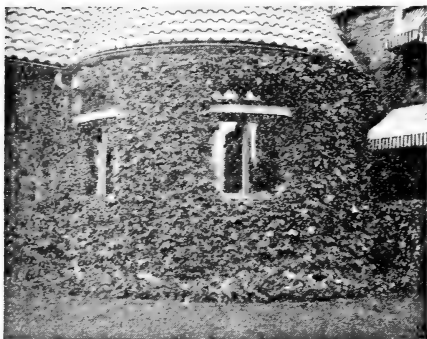

Prices on all above: From 2½ inch pots 25c; 4 inch pots 50c; 5 inch pots 75c; 6 inch pots \$1.25 each, and 7 inch pots \$2.00 each, postpaid.

603. HANGING BASKETS. Our baskets are well established and will greatly enhance the beauty of your porch. They are filled with Asparagus and Boston Ferns. We can make them of assorted plants and ferns as desired. We suggest shipments by express as they can be crated and will arrive in good condition. Prices: 10 inch \$2.00; 12 inch \$3.00, not prepaid.

Ferns for Hanging Baskets

Vines and Climbers

Boston Ivy

604. AMPELOPSIS VETCHII (Boston or Japanese Ivy). The most popular climbing plant for covering brick, stone, trees, etc. When it becomes established it is of a very rapid growth, and clings to the smoothest surface, the foliage is of a rich olive green during the summer months, changing to bright crimson and scarlet in the fall. Prices: 10 to 15 inches 50c each; 15 to 24 inches 75c each, postpaid.

605. ANTIGONON LEPTOPUS (Rosa Montana or Mountain Rose). A beautiful vine, with pea-like flowers, pink or rosy red colored, is one of the most beautiful climbers grown in the Southern States and desirable. Prices: 1 year old plants 50c; 2 year old plants \$1.00, postpaid.

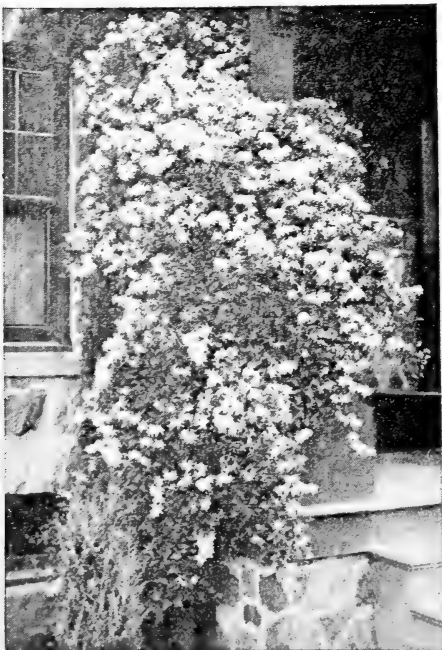

606. VINCA (Variegated Periwinkle). One of the very best plants for trailing over edges of window boxes, etc., leaves glossy green broadly margined creamy white with blue flowers. Prices: From 2½ inch pots 20c; 4 inch pots 40c each, postpaid.

607. IPOMOEA BONA-NOX (Blue Moonflower). A quick growing vine, having rich green foliage, one of the best vines that can be had for covering porches, etc. Flowers measure from 4 to 6 inches across, usually blooming in the afternoon. Prices: 30c and 50c each, postpaid.

608. IPOMOEA NOCTIFLORA (White Moonflower). Same as the above with white blooms. Prices: 30c and 50c each, postpaid.

609. HONEYSUCKLE (Chinese). A constant bloomer, producing fragrant white and yellow blooms. Prices: 12 to 18 inches 30c each; 18 to 24 inches 50c each, postpaid.

610. LONICERA (Scarlet Trumpet or Coral Honeysuckle). The most beautiful and brilliant of all Honeysuckles; bluish green foliage, scarlet berries. Prices: 12 to 18 inches 30c each; 18 to 24 inches 50c each, postpaid.

Clematis Paniculata

611. ENGLISH IVY.

One of the principal plants for covering tombs, as well as unsightly walls, of slow growth but very hardy, resists both heat and cold. Prices: 50c and \$1.00, each according to size.

Honeysuckle Vine

612. LONICERA BELGICA (Pink Honeysuckle). Very sweet, profuse and an almost perpetual bloomer, can also be trained as a bush. Prices: 12 to 18 inches 50c; 18 to 24 inches 75c each; 24 to 36 inches \$1.25, postpaid.

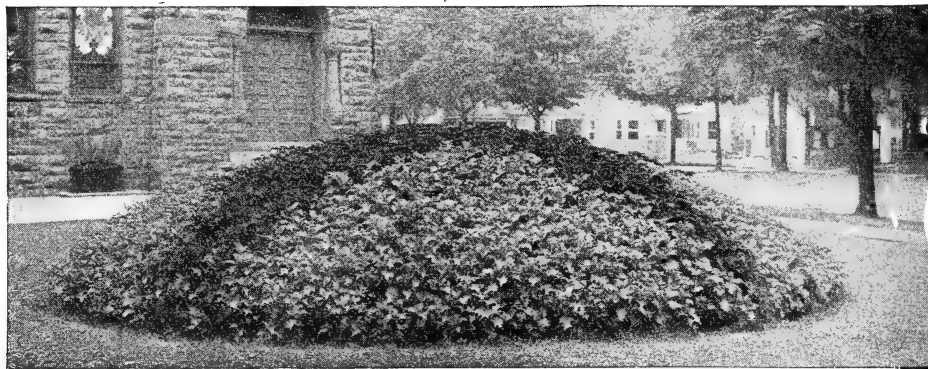

613. CLEMATIS PANICULATA (Japanese Virgin's Bower). One of the most beautiful hardy flowering vines. The flowers are pure white and are borne in large panicles or clusters of blooms, fairly covering the plant. Prices: 5 inch pots 50c each, postpaid.

614. WISTERIA. For trailing over buildings, plazas, verandas or trellises, the decorative features which their long graceful blossoms afford, makes a particularly pleasing effect. We have these in light blue and white. Prices: 18 inch 50c each and 24 inch \$1.00 each, postpaid.

615. BIGNONIA LAURIFOLIA. Evergreen glossy foliage, lavender flowers, finest vine for verandas, not subject to any insect pests. Prices: From 4 inch pots 75c each; 5 inch pots \$1.00 each, postpaid.

616. BIGNONIA TWEEDIANA. A very well known vine, producing yellow flowers; will make a good specimen plant in a large pot. Prices: From 2½ inch pots 30c each; 4 inch pots 50c each, postpaid.

751—Pecans

A Real Money Crop

The Pecan has become a very important nut, particularly in the Southern States and it may be said that there is no other fruit or nut tree which fits so well into the general farming of this region as the Pecan. Cotton, Corn, Cow Peas and other farm crops can be sown to advantage among the trees when they are young and even until the trees have begun to bear well. The region in which the Pecans may be grown with a proper selection of varieties, extends from Virginia to Florida, thence west to Texas and Oklahoma. As shade trees, they make handsome specimens and they are well adapted for street, road and yard planting.

Varieties

STUART—Nut large, thin shell, oblong in shape full meated, quality best, abundant bearer of rapid growth, popular.

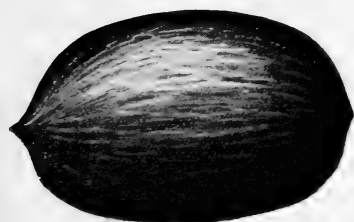

VAN DEMAN—One of the most attractive in appearance, rich, well flavored, medium large, elongated.

SUCCESS — Nut large and round with medium thin shell full and containing a larger quantity of meat than any other pecan on the market.

FROTSCHER'S (Eggshell)—Nut large, oblong in shape, very thin shell. Kernel plump, full, quality good, abundant bearer, rapid grower. A very popular variety.

SCHLEY—Nut medium size, oblong in shape, smooth, clean and bright in color, very thin shell, kernel very plump and rich.

Stuart

Van Deman

PECAN TREES—Proper Distance Apart for Planting

In deep alluvial soils 70 feet apart each way, requiring 9 trees to an acre. In sandy, poor soils, 50 feet apart each way, requiring 17 trees to an acre. Our trees are very fine and true to kind and variety.

Scientific Preparations Endorsed by Leading Rosarians and by Us

Conquers Mildew and Black-Spot on roses and diseases of other plants. Assures luxuriant foliage and bloom.

½ pt.	\$0.75	½ gal.	\$3.50
Pt.	1.25	Gal.	6.00
Qt.	2.00		

Destroys Aphis, and all Plant-Lice. Feeds the plant through the foliage. Splendid for house plants.

2 oz. (sample bottle). \$0.50	1 lb. (pint) \$2.25
½ lb. (½ pt.) 1.25	2 lbs. (quart) 3.50
	12 lbs. (1½ gals.) 15.00

A remarkably effective insecticide that rids your roses and plants of leaf-chewing insects, including caterpillars, slug worms, Japanese beetle, etc., and many blights. Also fertilizes the plant through the foliage. Use alternately as a companion spray with Fungitrogen. Both carry their own spreader. Only water is required.

4 oz.	\$0.60	Quart.	\$2.75
½ pt.	1.00	½ gallon.	4.50
Pint.	1.75	1 gallon.	8.00

All these sprays are highly concentrated, making 60 times their volume when diluted with water.

Spring-Summer Ground Dressing and Ground Stabilizer. A valuable plant-food. Reinforces manure fertilizer. Supplies essential elements to the soil.

1-lb. tins.	\$0.75	10-lb. tins.	\$4.75
2-lb. tins.	1.25	25-lb. tins.	11.00
5-lb. tins.	2.75	100-lb. kegs.	40.00

Autumn-Winter Ground Dressing and Soil Disinfectant. Destroys the spores of fungi of most diseases. Kills the larvae of insects, such as rose-pith, borer, rose bugs, Japanese beetle, aphids, and ants. A valuable fertilizer.

1-lb. tins.	\$0.75	10-lb. tins.	\$4.75
2-lb. tins.	1.25	25-lb. tins.	11.00
5-lb. tins.	2.75	100-lb. kegs.	40.00

NOTE—A 10-pound tin of Fero-gen or Tero-gen is sufficient for one application for 30 to 50 rose bushes.

759. BORDEAUX MIXTURE—Powdered Black rot, mildew, blight, leaf curl, scale, etc. Prices: 40c per lb. \$1.50 per 5 lbs., postpaid.

760. BUG DEATH—Use on tender vegetable plants for leaf eating insects. Prices: 35c per lb.; 75c per 3 lbs.; \$1.00 per 5 lbs., postpaid; \$2.00 per 12 lbs., not prepaid.

761. EVERGREEN—Non-Poisonous Insecticide.—Kills most plant insects, including lice, melon beetles, cabbage worms, mealy bugs, mites, etc. Is non-poisonous to man, animals, birds; it kills only insects. Economical, 1½ oz. bottle makes 9 gallons of effective spray, will not destroy fertility of the soil. Pleasant to use, easy to mix, won't gum sprayers, won't corrode metal or rubber. Keeps its strength indefinitely. Prices: 1½ oz. bottle, 35c; 6 oz. bottle, \$1.00; 1½ lb. bottle, \$2.00; 32 oz. bottle, \$3.85; gallon, \$13.00, not prepaid.

762. SHEPS PLANT SPRAY—Controls both Sucking and Chewing Pests. Can be used liberally as it will not injure foliage or sour the soil when used according to directions. Will not discolor leaves, nor burn the most tender plants. Use half oz. of Sheps Plant Spray to one gallon of water. Absolutely non-poisonous to human beings, birds animals or plants but sure death to most insects. Prices: 2 oz. bottle, 35c; 8 oz. bottle 75c; 16 oz. bottle, \$1.25; quart can, \$2.00; gallon, \$6.35, not prepaid.

763—

NEW WAY TO KILL GARDEN BUGS

PROTECT your flowers and vegetables this new way. Surprisingly easy! Simply sprinkle with a new kind of non-poisonous powder called PLANTGARD. Not only are bugs, worms and insects killed, but this almost magical powder also fertilizes the ground. No wonder flowers grow larger and brighter colored! Vegetables mature quicker and are more tasty. Yet it costs only a few cents to protect an entire garden bed.

788—RED STEER—10-4-7 (For Tomatoes), Sufficient Phosphoric Acid for early maturity and enough potash to give the fruit strong carrying qualities. Price: \$4.25 per 100 lbs., not prepaid.

789—Premier Brand Sheep Manure—Is an ideal soil conditioner and plant food for all plantings on home grounds, gardens, parks, cemeteries and private estates. Premier brand is pure western feeding pen sheep manure that has been thoroughly dried, sterilized and pulverized, and will not deteriorate with age if kept in a dry storage. For new lawns, broadcast at the rate of 8 to 10 pounds per 100 square feet, incorporating thoroughly in the surface soil by raking or harrowing. Sow seed and roll. For home garden

plots, 75 to 100 pounds may be broadcast per 1000 feet of surface after plowing or spading. **INSIST ON PREMIER BRAND.** Price: 5 lb. pkg. 60c, postpaid; not prepaid, 25 lb. bags, \$1.00, 50 lb. bags, \$1.75; 100 lb. bag, \$3.00.

790—Premier Brand Poultry Manure—A fertile soil is absolutely essential whether it be that of home ground and gardens, greenhouse or farmsoils. Natural animal manures have been one of the principal means for increasing and maintaining soil fertility. These manures in the dried processed pulverized form are easy to handle, are free of objectionable weed seeds and contains no rubbish that will be slow to decompose and easily become incorporated in the soil. Is best for turf, garden and specially farm crops for the following reasons:

It is a balanced manure containing 6% ammonia, 2 1/2% phosphoric acid and 1 to 2% potash. Contains no live weed seeds. Being organic, it adds humus and aids bacterial action. It can be applied with a minimum of labor and expense. Being more soluble than other manures, it is more available. Being finely pulverized, it is quickly absorbed into the soil.

To make new lawns, pulverize and level the soil, broadcast the Poultry Manure at the rate of 6 to 8 pounds per 100 square feet, raking well into the soil, sow seed and roll, then water. For renovating old lawns, top dress in spring and fall at the rate of 5 pounds per 100 square feet. For flower beds, annual, perennial and herbaceous plants, 1 to 2 top dressings in the spring and during the growing season will increase growth, size and color of both foliage and flowers, requires 6 to 8 pounds per 100 square feet. For vegetable truck crops, broadcast 800 to 1000 pounds per acre after plowing. For tree and bush fruits, the amount used per acre is necessarily dependent on the particular variety of fruit, age of trees and bushes, method of application used. Approximately 500 to 1500 pounds per acre may be safely and profitably used. **INSIST ON PREMIER BRAND.** Prices: 5 lb. pkg. 60c, postpaid; not prepaid, 25 lb. bags, \$1.00; 50 lb. bags \$1.75; 100 lb. bags \$3.00.

791—Lime—To sweeten and put the soil in condition for planting of any sort, use Hydrated, cover the soil and work in, this is very beneficial in putting acid soil in a sweet condition. Use at the rate of 2000 pounds to the acre. Prices: 1 lb. 15c; 50 lbs. for \$1.25; 100 lbs. \$2.00.

792. STECKLER'S INOCULATORS AND STIMULATORS

815. Whirling Showers Lawn Sprinklers

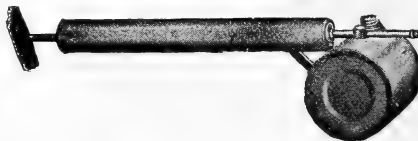

An adjustable revolving lawn sprinkler, made so that a mist or a heavy spray can be obtained. By using a fine adjustment of the nozzle and directing the nozzles themselves in the proper direction a light floating mist for watering golf greens, etc., is obtained. By opening the nozzles and directing them at a different angle the sprinkler revolves slowly and covers a circle of over 70 feet in diameter. Base is of malleable iron, cross arm, revolving shaft, the entire nozzles, packing gland, the bearing at the bottom of the main shaft and hose coupling are all made in brass. Price: \$3.00, not prepaid.

Steckler's Sprays and Tools

S16—VERMOREL DUSTER — No. 40 Equip-
ped with brush agitators. Annoyance and loss
of time due to choking is entirely eliminated
through correct agitation insured by the brush
agitator. Single action, Bellows Type. Very
light and compact in construction. Weight 11
pounds, capacity six quarts—nine to fifteen lbs.
of material. **Price: \$15.00, not prepaid.**

**S17 —VERMOREL
DUSTER** — No. 51.
Double Action Dus-
ter. Simple and com-
pact, economical and
efficient. For apply-
ing sulphur, arsenate
of lead, calcium ar-
senate Bordeaux
mixture. Nicotine
Dust, etc., either of
these models will give
excellent results. Dif-
fers from Figure 40
principally in the
fact that it func-
tions both on up and
down strokes, thus
giving forth a semi-
continuous flow. **Price
\$20.00, not prepaid.**

S19—THE VEX AUTOMATIC LAWN FERTILIZER dis-
tributor is a device enabling you to fertilize your
lawn as you sprinkle. Simply attach the short piece
of hose that comes with the machine to your faucet
or ground outlet. Attach your regular garden hose to
the end of the device. Then turn your water on
and sprinkle continuously for 40 minutes. Covers
2400 square feet (or a plot 60x40)
to obtain the best
results. Distribu-
tion is even and
results in a vel-
vety lawn. **Price:
\$7.50 for complete
distributor. Re-
fills \$2.00 each,
not prepaid.**

Poultry Department

877—PIGEONS—Homers, Carneau and Kings are especially adapted to the South. Homers and Carneau at \$1.50 per pair. White Kings at \$6.00 per pair. Common at \$1.00 per pair. (Express only).

POULTRY FEEDS

The Arcady Farms Milling Company started in business originally as Arcady Farms, Lake Forest, Illinois, many years ago. They had 200 head of registered cows, a flock of poultry and to insure the right kind of feeds started making feeds for nearby farms, and we kept extending until now this Company is one of the three largest commercial feed manufacturers in the United States.

The following feeds are second to none:

878. WONDER AND ARCADY BRANDS

Steckler's Wonder Laying Mash.
Steckler's Wonder Growing Mash.
Steckler's Wonder Buttermilk Starting Mash.
Steckler's Arcady Laying Mash.
Steckler's Arcady Scratch Grain.
Steckler's Arcady Developing Grain or Coarse Baby Chick Feed.
Steckler's Arcady Chick.

Feeding Directions: Feed Arcady Chick Grain with Wonder Starting Mash first four to six weeks, beginning after forty or sixty hours after hatching. Change to Arcady Developing Grains and Growing Mash when four to six weeks old, continue until maturity, when they are approximately five and one-half months old, then change to Arcady Scratch Grains and Arcady Laying Mash. Feed these for greatest returns from your laying hens.

GUARANTEED ANALYSIS ON ALL FEEDS

Steckler's Special Wonder Pigeon Feed.
Steckler's Wonder Calf Meal.
Steckler's Wonder Dairy Ration.
Steckler's Arcady Dairy Feed.

DON SUNG Chinese for Egg-Laying

880—MAKES HENS LAY!

A concentrated tonic—no filler—ready to add to the mash feed. Has direct action on the egg-laying organs, increases the appetite, puts the flock in better health and gets the eggs. Easy to give. Used by successful poultrymen from coast to coast.

Trial size 50c; large size (3 times the 50c size), \$1.00; Special size (6 times the \$1.00 size), \$5.00 postpaid.

881—
—FOR—
WHITE DIAR-
RHEA,
CHICK CHOLERA,
BOWEL
TROUBLES.

Simply drop an Avicol tablet in the chicks drinking water. Almost from that very moment, you will see the sick, droopy chicks begin to perk up and take a new interest in life. Usually, within 48 hours, the chicks that seemed too sick to live are running around as lively as crickets. Avicol puts chicks in good health, and keeps them that way. Guaranteed for both prevention and treatment. Trial size 50c; large size (almost 3 times the 50c size), \$1.00; Special size (6 times the \$1.00 size), \$5.00, postpaid.

884. BABY CHICKS

By Parcel Post, prepaid delivery to your home. Not less than 25 sold. 97 per cent alive delivery guaranteed. but all claims for loss or shortage must be made by purchaser upon receipt of shipment and accompanied by carrier's deposition showing such shortage. Shipments made from November to June.

White Leghorns—25 for \$4.50; 50 for \$8.50; 100 for \$16.00.

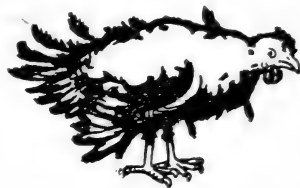

Barred Plymouth Rocks, Rhode Island Red, White Plymouth Rocks, Minorcas and White Wyandottes, 25 for \$4.50; 50 for \$9.00; 100 for \$17.00.

Aluminum Chicken Leg Bands, 25c per dozen; \$1.25 per 100, postpaid.

Celluloid Leg Bands (Chicken), 25c per dozen; \$1.25 per 100, postpaid.

882—CHICKEN LICE.

After many tests, the U. S. Department of Agriculture found Sodium Fluoride better than anything else for killing lice. We have Sodium Fluoride in the talcimized form, specially processed for use on poultry. Talcimized Sodium Fluoride (for short called T. S. F.) is guaranteed to kill all poultry lice—both old and young, including the lice that hatch from the eggs present at time of treatment. Trial size (enough for 50 birds), 40c; large size (twice the 40c size), 70c; Special Size (5 times the 70c size), \$2.65, postpaid.

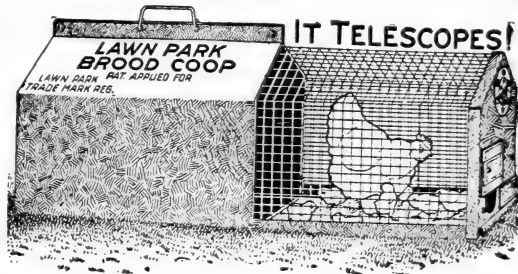

"I Need T. S. F."

Wormoids

883—WORMOIDS—

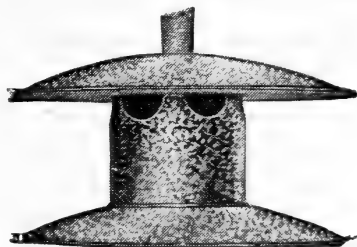

For Worms in Poultry. Most flocks are infected with worms. These parasites sap the health and vitality of the fowl, interfere with laying, stunt development and cost the poultry raiser thousands of dollars every year. Symptoms are drooping plumage, general weakness, loss of flesh or "going light," oftentimes paralysis and death. **Wormoids** is an individual treatment that is prompt, sure and safe. It comes in capsule form and is easily administered to every bird, usually at the same time the flock is culled, banded or treated for lice. Costs no more than flock treatments and is of course more sure and satisfactory. Come in following sizes:

50 capsules — Postpaid.....	\$1.00
150 capsules — Postpaid.....	2.00

885. LAWN PARK COOK

912. "OCULUM" A BLESSING

For 19 years "OCULUM," manufactured by The "OCULUM" Co., Salem, Virginia, has been a veritable blessing to stockmen and poultrymen. A few drops has often saved the life of a sick horse, cow, hog, dog or chicken. "OCULUM" is a harmless liquid germicide and puts animals and fowls in the pink of condition and makes much extra meat and many extra eggs. "OCULUM" is creating a sensation wherever it is known.

Bottles 50c and \$1.00, postpaid—Pints, \$1.50.

Quarts, \$3.00; gallons, \$10.00, not prepaid; sample, 10c, postpaid.
